FIRES RAGE AT CORONA

Sierrita County Forests Burn

Two Canyon Swept; House and Cows Flee to Escape Flames

Embers Fill Town; Fire Crews Give Battle to Halt Ravages

CORONA, Aug. 6. (Exclusive)—The worst mountain fire in the history of the Sierrita county is raging in the mountains of Corona.

At 2:30 o'clock this afternoon the fire was seen to shoot out of the mountains of Sierrita county.

The fire was seen to shoot out of the mountains of Sierrita county.

Will Rogers Remarks:

OLD HI FOG TOTTERING

Flyers Promise to Ban Mist

MacCracken Says Experiment to Clean Air at Fields Soon to be Success

SAN FRANCISCO, Aug. 6. (Exclusive)—On the eve of a conference with the Railroad Commission and a recently named aviation-regulation committee, W. P. MacCracken, Jr., assistant secretary of commerce in charge of aeronautics, said tonight that experiments to eliminate fog, one of the most persistent and dangerous foes of aerial navigation, are showing excellent prospects of success.

"We are giving considerable study to the problem of fog dispersment," he said. "We have no expectation of dispersing fog generally, only over airports. That is all that is necessary. Beacons will guide planes to the airports and a fogless area over the port will enable them to land with no difficulty at all."

PLANS DESCRIBED
 "One man has been experimenting with charged sand, throwing the sand down through the clouds, and, in fact, drilling holes in them. But the results have not been satisfactory and a fogless area over the port will enable them to land with no difficulty at all."

Another man is experimenting with a solution shot through a compressor. These experiments are being made privately but with the Department of Commerce co-operating. Favorable results will be obtained in time."

MacCracken's discussion with the Railroad Commission committee on aerial-safety regulations will be attended also by E. E. Knap, chief of the United States aviation inspector in this district.

Following the meeting MacCracken will visit Herbert Hoover at Stanford and as it was under Hoover's leadership as secretary of commerce that the great forward strides in aviation were made.

The Railroad Commission committee was organized and held its first discussions several days ago. MacCracken said that the committee's advice and suggestions of the aviation inspectors will be of great benefit to its members in simplifying their plans of procedure at the next meeting, which is to be held in Los Angeles next month.

MacCracken's discussion with the Railroad Commission committee on aerial-safety regulations will be attended also by E. E. Knap, chief of the United States aviation inspector in this district.

FLORIDA HAS GALE SCARE DURING DAY

Tropical Storm Raging in Bahamas Now Believed to be Heading Up Coast

MIAMI (Fla.) Aug. 6. (P)—A tropical storm which raged about Nassau, in the Bahamas, today, is believed to have returned to the north-northeast, leaving Nassau damaged but little and precluding danger of heavy gales on the lower East Florida coast.

Until the middle of the day the center of the storm was reported by the Weather Bureau here to be moving west-northwest toward Florida, with gale warnings out along the whole coast from Key West to West Palm Beach, but radio reports from the Bahamas indicated late today the disturbance is passing up the Atlantic slightly west of the Florida coast.

Vessels took the shelter of the Nassau harbor after receiving warnings, and are said to be riding well through a gale that increased in intensity throughout the afternoon.

The Weather Bureau there expressed the belief that the storm is passing to the southwest of the island about tonight. Heavy rains drenched the Bahamas.

All craft are sticking to the harbor here. Due to an abnormally high tide, residents along the sea and bay fronts were advised to protect themselves against possible water damage.

Falling barometers are noted along the coast from here to West Palm Beach.

NEW GEYSER SPOUTING IN FAIRY CREEK

Yellowstone Park Blower Believed One of Largest in World, Rises 100 Feet

YELLOWSTONE PARK, (Wyo.) Aug. 6. (P)—Yellowstone Park has a new geyser in point of volume and magnitude believed to be one of the largest in the world.

The new blower burst out in the Fairy Creek region of the national park and approaches the size of the famous Excelsior geyser, which stopped playing in 1904.

From a crater 100 feet wide, 120 feet long and eight feet deep the new geyser bursts forth twice each twenty-four hours and for a three-hour period throws a stream of water seventy-five feet high. Occasionally the perpendicular stream reaches a height of 100 feet and at such times loud explosions occur every ten or fifteen seconds. Many short diagonal streams spurt out of the crater.

The geyser is only a short distance from the location of the old Excelsior.

Way to Palo Alto

CHICAGO, Aug. 6. (AP)—Gen. Nathan William MacChesney, returning home from a tour of the West and a visit with Herbert Hoover, conferred with party leaders at western headquarters of the National Republican Committee today, reporting a "crystallized sentiment throughout the territory" for the Presidential nominee.

Gen. MacChesney, Chicago soldier and lawyer, who was a schoolmate with Hoover at Stanford University, described three separate

RESPECT FOR LAW
"Second, whether they are in favor of any particular law or not, there is a widespread respect for the law itself in the West and the plain people have a feeling of uneasiness about the nullification talk of Gov. Smith."

Third, the western farmer has more faith in a man, raised from a barfoot boy in the western farm country to solve the passing problems of the western farmer rather than a man of political antecedents of New York's man Smith."

BLOWS HEAD OFF
WITH DYNAMITETurk Places Explosive in
His Ears, Ignores It
With Cigarette

EDREMIT (Turkey), Aug. 6. (AP)—New Turkey, still in the throes of transition, is becoming used to an unabated epidemic of suicides through drowning, poisoning, shooting and stabbing. But a method of self-destruction unique in Anatolia broke the monotonous suicide chronicle recently when a melancholy policeman in this village stuffed his ears with dynamite and lighted a cigarette. There was an explosion.

phases of what is called "Hoover sentiment" in the West.

First, the faint of Tammany is too suggestive of all that is evil in politics, the general said, "for the western citizen to stand for. It is repugnant to all his political ideals."

JUSTICE AS GUEST
Associated Justice Stone of the United States Supreme Court and Mrs. Stone are guests of Mr. and Mrs. Hoover for several days. During the afternoon, the nominee accompanied the justice to the war library at Stanford University, which has become the mecca for historians the world over because of the store of information bearing on the great struggle and its aftermath which the library contains.

Dwight Davis, Secretary of War, who is on his way to inspect the army post at Honolulu, also called at the Hoover home, taking with him a number of subjects with the nominee, including Mississippi River flood control, aviation and oil.

FIGHT PLANNED
A. O. Cook of Townsend, Mont., Republican leader in his State, conferred with James W. Good, western manager, today. Mr. Cook said Montana Republicans are planning a vigorous fight. Mr. Cook also said he believes Joseph M. Dixon will defeat Burton K. Wheeler, seeking re-election as Senator.

Dr. Hubert Work, Senator from Oregon, and other members of the official notification party, left Chicago today for California, where they will arrive Thursday, two days in advance of the notification ceremonies.

MOSES CONFIDENT
"The lines of this campaign," Senator Moses said, "cannot be definitely fixed until after the speeches of acceptance have been delivered. Since Gov. Smith has undertaken the sides the Democratic platform we have to get from him some statement which will indicate where his feet are placed. If they are placed definitely at any time in the campaign."

However, we already know enough of the campaign outlines and general conditions throughout the States to realize that we confront an alert, adroit and an astute foe.

"This means, of course, that we must prepare ourselves to fight at every step of the way. We are making the fight and we will win it."

With Party ChiefsWest Branch Speech Gets
Special Attention

STANFORD UNIVERSITY, Aug. 6. (AP)—Spending his day in a round of conferences with party leaders and others, Herbert Hoover decided today that affairs of the campaign would not permit of realizing his desire to visit the Sierras in Central California before the delivery of his acceptance address next Saturday.

Those who called to see the Republican Presidential candidate during the day included William R. Crocker, Republican National Committeeman for California; David Kahn, president of the California Grape Growers Association; and Matthew Brush and Carl Dennett of Boston, both close personal friends of President Coolidge.

JUSTICE AS GUEST
Associated Justice Stone of the United States Supreme Court and Mrs. Stone are guests of Mr. and Mrs. Hoover for several days. During the afternoon, the nominee accompanied the justice to the war library at Stanford University, which has become the mecca for historians the world over because of the store of information bearing on the great struggle and its aftermath which the library contains.

ELEPHANT GRABS
DONKEY STALLMariposa for First Time in
His History Has Majority
of Republican Voters

MARIPOSA, Aug. 6. (AP)—

For the first time in history the town of Mariposa has registered a majority of the twelve Republicans over the Democratic affiliation.

Mariposa was for many years the banner Democratic county of the State, but during the last few elections has switched to a Republican majority. However, the town of Mariposa itself retained the distinction of remaining Democratic until the present registration.

Lillian M. Gilbreth, member of the Executive National Committee, organized in New York to enlist the support of all engineers for the Republican nominee.

Asserting that Hoover has an excellent chance to carry New York despite the fact it is his opponent's home State, Gilbreth declared that she would not vote for him as President.

"At the last Presidential election, Gov. Smith, up for re-election, carried New York by a majority of only approximately 125,000, which is not great when it is considered that the total vote was about 3,000,000. At that election Gov. Smith, who was supported by many Republicans who, while they might vote again to elect him Governor, will not vote for him as President."

HOOVER'S APPEAL
"He is not popular with the agricultural interests who will accord little credence to his promises to them. His record as Governor is one of opposition to the State Department, which he cannot control politically, and the executives of this department are popular with the agriculturalists."

The record of Mr. Hoover is one of accomplishment in the various fields of endeavor which have done him credit, but he has not done his duty as Governor in the course of his administration.

The record of Gov. Smith is one of accomplishment along lines of political expediency only. In such a case, the gubernatorial record is of little value to the party.

Senator Knight is here to represent the New York Senate at the notification ceremonies.

CHICLE KING URGES VOTE FOR HOOVER
Smith Makes Good Mayor, but He's Not Right Man for President, Says Wrigley

"Al Smith is a fine fellow, a great guy, but he'd never make a good President. He would make a dandy Mayor."

Those were the words used to sum up the coming Presidential election by William Wrigley, Jr., multimillionaire chewing-gum king, baseball magnate and owner of California Island, on his arrival in Los Angeles yesterday for his annual summer vacation in Southern California.

"You know I had Al Smith working for me in my New York trucking business and he had been doing a fine job for Governor and I got to know him real well," continued Wrigley. "Al had a big office and everything, but he never got to do much work because there were so many politicians calling on him. However, Al's experience came in handy to the firm because he fixed it up so our trucks could back up over the sidewalk, turn around in the middle of the street and enjoy various other conveniences."

Wrigley said Hoover is the ideal man for President. He has had plenty of experience and has all of the qualifications necessary to make a wonderful President. "I think Hoover is a cinch to win."

Wrigley intended to remain in Southern California for at least a month and will spend most of his time in Catalina Island.

RASKOB SEEKS FARM PLAN
Columbia Professor of Economics Engaged to Evolve "Nonpolitical" Relief Scheme

NEW YORK, Aug. 6. (AP)—John J. Raskob, chairman of the Democratic National Committee, today announced he has retained E. R. A. Seligman, professor of economics at Columbia University, to make an "exhaustive and nonpolitical" study of the farm problem.

"His survey," Raskob said, "may take weeks or months, but it will enable me to understand the true economics underlying the farm situation."

"There can be no question but that there is some manner in which the farmer's problem can be solved along lines that are economically sound; that orderly instead of chaotic marketing and intelligent business control of surplus crops will tend to give the farmer higher prices for his produce."

"This result must be accomplished without artificiality, without controlling prices, and the cost should be borne by the crops benefited—not by the government."

Mr. Raskob said he is open-minded on the subject of the equalization fee, explaining he never has read the McNary-Haugen bill or studied the economics of equalization. Neither does he know, he said, what position Gov. Smith will take on the farm problem in his acceptance speech.

"Our industries pay high wages to maintain the high and happy standards of living we have adopted," Mr. Raskob said. "Both the Democratic and Republican parties

THREE STATES
TO VOTE TODAYMissouri, Oklahoma and
Kansas Hold Primaries"Show-Me" Campaign Alone
Has National IssuesWet-and-Dry Issue Involved
in Senate Race

KANSAS CITY, Aug. 6. (AP)—Primary campaigns in Missouri, Kansas and Oklahoma were wound up tonight as candidates made their final pleas for votes in tomorrow's elections.

National issues gained attention only in Missouri where sharp battles have been waged among candidates in both the major parties for the nomination for United States Senator.

The wet-and-dry question enters into both the Republican and Democratic campaigns in Missouri, with Senator Reed, who is retiring from public office, espousing the cause of James A. Collier, a salaried aviator, who is seeking the Democratic nomination.

Opposing Collier is Charles M. Hay, St. Louis attorney, an ancient political enemy of Reed and a dry. In a series of speeches through the State Reed called for the defeat of Hay on the ground that the St. Louis candidate was not in harmony with the prohibition avowed by Smith of New York, the party standard bearer.

The law-enforcement plank adopted at the national convention at Houston covered the liquor question and was varied enough for all sections of the party to stand upon.

Three candidates for the Republican nomination in Missouri are Francis M. Pickens, Nathan Frank, a wealthy St. Louis lawyer, and W. O. Atkinson of Butler, Roscoe C. Patterson, United States District Attorney at Kansas City, and W. O. Atkinson of Butler, Roscoe C. Patterson, United States District Attorney at Kansas City, and W. O. Atkinson of Butler, Roscoe C. Patterson, United States District Attorney at Kansas City.

Prohibition also was made an issue in the gubernatorial campaign. The Republican contestants are Lieut.-Gov. Phil A. Bennett, Dr. Henry B. Caulfield, St. Louis, who has opposed the State prohibition and three others, William R. Schneider, Frank H. Wieland, Sam H. Hoggins, avowed opponents of the dry laws.

On the Democratic side, State Senator A. L. McCawley, author of Missouri's home-dry law, is opposed by Francis M. Wilson of Platte City, who announced he will take a firm stand on the prohibition question if nominated.

Fifteen of the sixteen Missouri Congressmen are seeking re-election. George H. Conner of St. Louis, City, the youngest member of Congress, being the only Representative not after another term.

In Kansas principal interest centers in the race for Governor with large fields in both Democratic and Republican races. D. R. Anthony, Jr., Democratic Representative from the First Kansas Congress District, and Hayes B. White, Republican, Sixth District, are the only Congressmen not running for re-nomination.

In the Oklahoma Congressional race all the incumbents are up for re-nomination. Only minor State offices are to be voted on.

San Joaquin Will Have Air Service

SAN FRANCISCO, Aug. 6. (AP)—Institution of a new local air line to serve San Joaquin points between San Francisco and Los Angeles was announced today by Adelbert T. Hay, Jr., president of the Yellow Wing Commercial Air Service.

A fleet of six-passenger all-metal, single-motored cabin monoplane will be used. The new line will have stops at Merced, Modesto, Visalia, Fresno, Tulare and Bakersfield.

Special air-limousine week-end service to Los Angeles, Lake Tahoe and the Sierras also is planned by the company.

Evans Bound for Tennessee to Aid Hoover

WASHINGTON, Aug. 6. (Exclusive)—Representative W. E. Evans of Glendale, Cal., arrived in Washington today on route to Tennessee to assume management of the Hoover campaign in that important border State. Evans plans to remain here until next Wednesday conferring with Republican leaders and influential Tennessee Republicans who are coming here to meet him.

Although he has opposition for re-nomination, Evans dropped his own campaign when asked by Secretary Hoover and Dr. Work to take part in the Tennessee fight.

He said preliminary conferences with the Tennesseeans convinced him that Hoover "has better than a fifty-fifty chance to carry the State."

He declared he believed the Republicans also will carry Kentucky, West Virginia and Oklahoma, other border States, and capture North Carolina for the first time in the history of the present major parties.

GIRL SENTENCED
TO QUIT FAGSTossing Lighted Cigarette
from Automobile
Ends Fugue

SACRAMENTO, Aug. 6. (Ex-clusive)—Total abstinence

from smoking for the next six months was the sentence imposed on Miss Ethel Notley of Fortuna, by Justice of the Peace E. B. Robertson, for throwing a lighted cigarette from a moving automobile.

The judge fined Miss Notley \$10, but suspended sentence on condition that she refrain from smoking for six months. During her probation Miss Notley will be required to report once a month to State Fire Ranger E. D. Orbanum, who arrested her.

PRESIDENT
OPTIMISTIC
ON HOOVERPopularity of Nominee
Sufficient to Elect Him,
Coolidge Tells Visitor

SUPERIOR (Wia.) Aug. 6. (AP)—Senator Dale of Vermont today said that President Coolidge has expressed his certainty that Herbert Hoover will be the next President of the United States. The Senator, before leaving Superior, said that the Chief Executive gave expression to that view during a conversation yesterday when the Vermont leader called at the summer White House.

Senator Dale, who spent several hours yesterday at the summer White House, said the Chief Executive, usually reserved in his judgments, and cautious as to predictions, made it plain that he considered Mr. Hoover's popularity with the electorate more than sufficient to elect.

The Vermont Senator admitted that in the course of his visit to Cedar Island Lodge, Mr. Coolidge asked more questions than he gave replies, but added that in addition to a specific admission as to his feelings regarding the Hoover candidacy, the trend of the Chief Executive's remarks bore ample testimony as to his belief.

President Coolidge, Senator Dale said, is interested in Mr. Hoover's success at the polls for more than mere party reasons. The Chief Executive, the Vermont Senator said, showed himself yesterday a great admirer of his Cabinet officer and eager because of personal sympathy and friendship that Mr. Hoover be elected.

GOV. SMITH
RETURNS TO
FIRING LINEPlans Study of Legislative
Record Attacked by White
But Keeps Move Quiet

ALBANY (N. Y.) Aug. 6. (AP)—Back on his own battle front after a ten-day vacation, Gov. Smith gathered ammunition today for a defense of his legislative record, but kept mum as to the use he will make of it.

Asked point blank whether he intended to fire a salvo in the direction of William Allen White, Kansas editor, who has been one of his most outspoken critics, the Democratic nominee for President said he had not made up his mind what his tactics would be.

"I've called for the record and intend to study it," said the Governor, referring to White's charge, originally that as an Assemblyman Smith favored the action, gambling and prostitution in his attitude on legislation, and later modified by White to apply only to the liquor interests.

"Does that imply that you intend to reply to Mr. White?" a reporter asked the nominee.

"I'll cross that bridge when I come to it," Smith retorted. "I haven't seen any of that stuff. I don't want to pin myself down until I can study it."

It is the Governor's intention, with the aid of advisers, to go over in detail the White charges relating to the saloon, and then to determine whether a direct reply should be made.

ESTIMATES FOR
BUDGET VIEWEDCoolidge Studies Forecast on
1930 ExpensesFigures Total \$400,000,000
Over Last AccountIncrease Due to Larger
Appropriations

SUPERIOR (Wia.) Aug. 6. (AP)—President Coolidge today went over the preliminary budget estimates for the fiscal year 1930, which were brought to Cedar Island Lodge by Brig.-Gen. Lord, director of the budget, who arrived from Washington this morning.

The total estimates prepared by the Budget Bureau totaled slightly under \$400,000,000, an increase of about \$400,000,000 over the previous budget but still within the maximum which President Coolidge had aspired not to exceed in 1930.

INCREASE EXPLAINED

The increase was explained by Gen. Lord as due to substantially larger appropriations for various government departments and to the fact no items were omitted from the estimates, as had been the case in past years.

Estimates for national defense in 1930 were raised to \$289,000,000 from the \$269,000,000 of the current year. Army and navy aviation will have \$11,000,000 more than in 1929 or a total of \$69,000,000.

DEFICIT POSSIBLE

The sum of \$95,000,000 was devoted to Gen. Lord's estimates for carrying out the Federal public building program, an increase of about \$1,700,000 over the previous year. About \$10,000,000 were allotted to the War and Navy Departments for their building programs.

Although paper computations of the Budget Bureau pointed to a deficit of about \$100,000,000 June 30, Gen. Lord believed that a Treasury surplus would still be shown at that time. The possibility of a deficit was to be found, he said, in the large appropriations made by Congress accompanied by cuts in the large revenue due to the tax reduction promulgated last spring. In effect he believed that an increase in revenue would result from the last tax cut, allowing a surplus to be declared.

Aerial Education
Control Sought

SACRAMENTO, Aug. 6. (Exclusive)—Rigid control of all aerial education, with a view to eliminating incompetent instructors and inadequate schools, is advocated by the American Aeronautical Education Association of Los Angeles, which today filed articles of incorporation with Secretary of State Jordan.

It also is the purpose of the association to establish a system to endow air courses, to establish schools and to make a comprehensive survey to promote safer air transportation.

The directors are Merle A. Stange, Kenneth Brown and L. Byron Frost of Los Angeles, and Fieldhouse of Santa Monica and A. Morrison Campbell of Culver City.

NORDIC HIGHHAT KNOCKED AWRY

Professor Calls Superiority Belief Mere Myth

Institute of Politics Hears Orientals Praised

Great Future Forecast for Peoples of Pacific

WILLIAMSTOWN (Mass.) Aug. 6. (AP)—The popular theory of Nordic supremacy over other world races has no real foundation and arises from the conceit of the Nordic, Prof. R. D. McKenzie of the University of Washington, said during a round-table discussion of the Institute of Politics here today.

No basis for this supposed supremacy exists from a biological point of view, or from that of technical development and the assumption that peoples with superior technical culture are superior to other peoples has no scientific validity, the speaker declared, the white man's advantage today over the oriental, for instance, resting merely in the fact that the white man "got the start."

SECOND WEEK
Informative discussions of national and international affairs have entered on their second week at Williamstown, where the Institute of Politics is in session. Political and economic problems on the Pacific, inter-American relations, the protection of citizens in foreign countries, agriculture, and Turkey and its rehabilitation are among the continuing subjects that will be discussed in round-table gatherings and general conferences; also there will be lectures on Belgium and Turkey.

"The more we study and classify human beings scientifically into types," Prof. McKenzie told his listeners, "the more confused we become about the meaning of the term race, because the peoples of the world are all mongrel, hybrid or mixtures of migrating peoples of the past. This makes for great difficulty when the attempt is made to pick out, fewer racial types."

RELIEF ASSAILED
The old color classification has no scientific validity, asserted the speaker, who said "we might as well try to classify flowers by their color."

Color has great sociological significance, however, he added, for it tends to differentiate groups and keep peoples apart, even though the peoples of different color may be bound to a wide variety of racial stocks.

"The concept that the Nordic is superior to the oriental because he has more and larger industries has no basis in science," Prof. McKenzie continued. "The Nordic happened to be the first to use mechanical energy and just happened to have the resources of energy, and thus got the lead over the rest of the world in the nineteenth century that has given him the big head."

Now he tries to explain this on the basis of race.

ORIENTALS LAUDED
"It is very evident that orientals, once they get the scientific spirit that dominates the West, will equal

the white man in any kind of effort, whether cultural, commercial or scientific."

The speaker described what he termed the "racial garland" of the Pacific, declaring it was all colored prior to the coming of the Europeans. The colored aborigines are feeding people, he said, but the substantial blocks of population on the Asiatic side, Japanese, Chinese and Malays, do not yield to the white man's pressure and have themselves overrun settlements of more culturally backward peoples.

About 800,000,000 people live on or are in the Pacific, of which number about 20 per cent are white, declared Prof. McKenzie. It is unthinkable, he said, that the future of the Pacific will belong to the white race alone.

FIELD FOR COMMERCE
Belief that the Latin-American republics offer the most attractive field for the development of United States exports in the immediate future, was expressed by Prof. Harry T. Collings of the University of Pennsylvania during the round-table discussion on inter-American economic and commercial relations.

In developing this field, however, he said, the business man from the United States must be prepared to recognize the existence of a business policy entirely distinct from that prevailing in this country.

Prof. Collings said that the Latin-American stresses the social side of business to an extent unheard of in this country, and that conservatism is a clearly marked tendency in all of its dealings.

He said that the individual's claim to diplomatic protection depends very largely upon the nature of his rights as an alien under the laws of the country.

Prof. Collings said that the Latin-American stresses the social side of business to an extent unheard of in this country, and that conservatism is a clearly marked tendency in all of its dealings.

First Picture of Rescue of Courtney at Sea

(Associated Press Telephoto Transmitted by Bell System.)
Myers Taken From Disabled Plane in Mid-ocean
The picture shows Capt. Courtney and his three companions on the attempt to span the Atlantic being taken on board a small boat from the liner Minnewaska. The flyers arrived in New York yesterday aboard the liner.

COURTNEY IN NEW YORK

Wrecked Flyer Tells of Fire That Ended Flight and Says Seaplane Would Have Floated for Days

NEW YORK, Aug. 6. (AP)—Capt. Frank T. Courtney and the three companions who chased death after their seaplane "Whale" crashed at sea in mid-ocean, reached New York today on the liner which picked them off the floating wreck of their aircraft.

It was a nonchalant crew which stepped off the city tug Mazon at the Battery, shook hands with Mayor Walker at City Hall and drove up Broadway through hurrying crowds to the hotel where they will stay while here.

Capt. Courtney did the talking for his companions while the Mazon steamed from quarantine to the Battery and it was a graphic story he told of the forced landing, the hours of drifting, the fire in the engine room of the plane and the final rescue by the liner Minnewaska.

DROPPED TO WATER
"We were up 1500 feet when the fire broke out," he said, "and it took us only thirty seconds to drop to the water while Fred Pierce (the mechanic) stopped the gasoline feed cocks. We veered over thirty degrees and came down smack on the incline of an ocean swell with the aid of the flare made by our own flaming ship."

The crew thought there was a slim chance for any of them, he said, but they carried on even though Courtney had to stand up in his seat as the ship landed to protect his glasses, without which he is virtually blind.

"The flight itself was a failure," he said, "but the results are not. It was necessary to fall in order to demonstrate that a plane like ours forced down in mid-ocean can be saved with the aid of a good radio."

When the engine room broke into flames, he said, he was talking to Pierce through a speaking tube from the pilot's seat.

DETECTS FIRE
"Suddenly Pierce, whose head I could see, disappeared," he said. "Then there was a red flash on the windshield and I knew what had happened. There was only one thing to do—get down as fast as possible, and we did."

Just after they struck the waves, Courtney went on, "the flames began to sputter and go out. It had been so hot that the metal struts supporting the engine were fused together, but that did not weaken the ship enough to send the motor out through the bottom."

When they discovered they were not sinking, Hugh Gilmour crawled over to his radio set, hoisted his emergency aerial and began shouting out his SOS.

WAS SEAWORTHY
"So that was all there was to it," Courtney said. "After a while the Minnewaska picked up the signal and although we floated along out of position with the gulf stream, they picked us up."

"But if the Minnewaska hadn't come along we would have floated indefinitely. We could have stayed afloat for days in rough weather and weeks in mild weather. That flying boat is unbreakable."

"I set out on this flight," he added, "to demonstrate that if there ever is to be successful ocean flying it must be done in the kind of boat we used. With that craft and a radio it can be done."

"If the Spanish ship reported near the Whale now will only let it alone I believe she'll float to the coast of Spain and we'll be able to use it again."

send your laundry to

PEERLESS!

OFF for the beach with the children! Live your one life happily! Free yourself from the work and steam and perspiration of the old washing machine... be rid of the day-long bother of home "wash-helps"... and, for goodness sake, don't think for a minute of bending and rubbing over a tub yourself!

Send your washing to PEERLESS, the World's Largest Laundry... know that it is coming back in a few days cleaner and sweeter than all the home labor and bother in the world could make it... and at a smaller cost, too. Then off for the beach or the hills, to keep cool and happy and fit for the difficult daily duties of a housewife and mother!

TRANS-SEA FLIGHT AIM RIDICULED

Shenandoah's Engineer
Declines Feasibility of Plane Service

NEW YORK, Aug. 6. (AP)—Capt. Anton Heinen, consulting engineer and pilot of the ill-fated dirigible Shenandoah, arrived from a trip to Europe today reiterating his faith in lighter-than-air craft and ridiculing the practicability of planes for trans-Atlantic flights.

"Airplanes attempting trans-Atlantic flights are comparable to men walking tight ropes with wheelbarrows," he said. "It is possible for a skittish tight-rope walker to do this stunt and push ahead of him on his narrow small quantity of balance, but only a few do it and after they do it what have they done? The public stands on a tight rope for no other reason than it bets against the tight rope that he can't make it. The whole thing is a matter of stunts."

While in Germany Capt. Heinen inspected the new Zeppelin being built for a flight around the world. "She is a wonderful ship," he said, "and will be able to come and go whenever she is of a mind to set out. There is no question about her being able to make the voyage across the Atlantic and proceed around the world. I can say the same thing for the new British dirigible."

The dirigible R-100 is near completion in England for a flight to America.

LIBERALS WIN IN PANAMA ELECTION

PANAMA, Aug. 6. (AP)—Returns from Sunday's general election today indicate a complete victory for the Liberal Congressional candidates.

Election of Florentino Arosemena, civil engineer and Liberal candidate for the Presidency, was conceded. George E. Boyd, only opposition candidate, withdrew last week.

Order and calm prevailed. All saloons were closed at noon Saturday for forty-eight hours as a precautionary measure.

GOLDEN EAGLE WRECK
HUNT ON ISLAND ENDS

HILO (T. H.) Aug. 6. (AP)—The search for the Golden Eagle, lost Dole air-race airplane, and its pilot, Jack Frost, and navigator, Gordon Scott, has been abandoned. Scott's brother, Denham Scott, has spent several months searching the Hawaiian Islands, hoping that his brother and companion had crashed on some mountain side away from habitation in their attempted flight from Oakland, Cal., to Honolulu.

SAFE through MODERATION

SECURITY BANK loans money on first mortgage security which it considers **SAFE**. For such loans, it asks only a moderate rate of interest.

There is safety, also, for the borrower whose obligation conforms to Security requirements. The wider margin between his loan and the conservative valuation of his property protects him, as well as the Bank.

Security Bank, in dealing direct with borrowers, exacts from them no "commission" or extra charge above the necessary expenses of the transaction.

Security mortgage loans may be arranged with equal facility through any Branch as at the Head Office.

CLERGY DENIES OBREGON GUILT

Mexican Archbishop Replies to Public Criticism

Charge of Influence Used on Slayer Assailed

Religious Liberty Plea Also Made by Prelate

MEXICO CITY, Aug. 6. (AP)—A statement declaring that the Mexican clergy is completely innocent of the crime of the assassination of President-elect Obregon was issued in Mexico City today in behalf of the episcopal subcommittee. The statement was sent to the newspapers in the name of Archbishop Miguel De La Mora of San Luis Potosi.

Hope that the laws "limiting religious liberty" will be changed in Mexico also was expressed in the statement.

No information was given out regarding the whereabouts of Archbishop De La Mora. Most of the bishops and archbishops supposedly are exiled outside of Mexico.

The archbishop declared that one Catholic priest and one nun being involved in the crime did not mean that the clergy as a body was responsible.

The statement asserted that it is publicly known that the Mother Superior Concepcion Azevedo De La Lita is mentally deranged and that several cases of insanity have been reported in her family. The mother

EAST AND WEST MEET WHEN NURSE MARRIES

HONOLULU, Aug. 6. (Exclusive)

Marriage customs of old China, with popping firecrackers and tea ceremonials, as well as a modern church wedding with white satin, bridesmaids and the "Lohengrin" march, marked the nuptials of a former Los Angeles city health nurse, Miss Margaret Tai Mei Lum and Tai Tong Ching, a medical student of Northwestern University.

Both the bride and her husband are modern young Americans by birth and training but of pure Chinese blood. She is the first of her race to attain a place as staff nurse in the city of Los Angeles.

Earlier in the afternoon, the modern American bride had been a demure maid of the Orient, wearing a costume of the gorgeous silks of

superior was named by Jose De Leon Toral, the slayer, as having indirectly influenced him.

DEFENSE VOICED
The statement says that 90 per cent of all Mexicans are Catholics. Therefore any person committing any crime in Mexico probably is a Catholic. But this does not mean that the Catholic clergy, episcopate and the great body of people who are Catholics are implicated in the crime.

Discussing police investigations into the assassination of Obregon by Jose De Leon Toral, the statement says that the result demonstrates clearly that the Catholic clergy had no responsibility for the crime. An interview with President Calles with a correspondent there is mentioned, the statement says that remarks were attributed to President Calles modifying his previous declaration that the Catholic clergy was responsible.

"For the Catholic clergy to have material, intellectual or moral responsibility for the crime, it would be necessary that the great majority of the body of the clergy knew of or supported the intentions to commit the crime," the statement says. "There are 400 Mexican Catholic clergy scattered through Mexico or abroad, unable to meet or communicate with each other and carefully watched."

INTENTIONS SECRET
"It is really impossible for the clergy to have known that a crime was intended. But the actual facts are that police investigations show that only one Catholic priest is charged with connection with the crime and Toral himself declares that nobody, not even that priest, knew what he (Toral) intended to do."

"If one soldier, or for that matter, ten or twelve loot and assassinate, is the entire army charged with responsibility for that crime? If one physician commits a crime, a lawyer or several physicians or lawyers, is the entire body of doctors and lawyers blamed for the derelictions of a few of their fellows?"

"By what logic can the Mexican episcopate and clergy be charged with responsibility for Toral's deeds which the Holy See itself has energetically reproached, which all Catholic spokesmen deplore and of which the Mexican episcopate and clergy were ignorant and lament?"

"Assuming that Toral or others of his associates carried their religious fervor to fanatical extremes, is that rare in the history of the world? History unfortunately testifies that at all times and in all countries have appeared fanatic, persons suffering from illusions, maniacs who have believed themselves sent by God to suppress those they think are their enemies."

VATICAN ORGAN ACCUSES CALLES

(Copyright, 1928, by the New York Times)
ROME, Aug. 6. (Exclusive)—The Observatore Romano, the official Vatican organ, recapitulating and summarizing all the evidence as far gathered on the Obregon murder, implicitly makes the statement that the assassination was planned by

old China. Earlier in the week a chest of gifts had arrived from the bridegroom, marking the formal betrothal. Yesterday another larger box of gifts came which included bracelets of jade and yellow Chinese gold and many cakes, candles and firecrackers for the celebration at the home of the bride's parents, where the family and intimate friends were gathered.

At the close of this feast, according to age-old tradition, the bride left, attended by a middle-aged woman friend, to go to the home of the bridegroom's parents. On arrival there she served tea to them in the old way of a dutiful daughter-in-law. The guests from the other party gradually followed the bride and another feast was in progress from which she had to slip away to put on her white satin bridal robes for the church ceremony.

President Calles himself, or at least by men or organizations very near to him.

In order to provide an alibi an effort was made to convince the Catholics, but the effort is failing completely in the light of ascertained facts, it is said in the Vatican paper.

COL. RHEA NAMED MARE ISLAND CHIEF

WASHINGTON, Aug. 6. (AP)—Col. R. Y. Rhea, who recently completed a course at the Army War College here, has been ordered to Mare Island, Cal., to succeed Col. W. H. Pritchett as commander of the marine barracks, effective the 15th inst.

NIGHT CLUB INDICTEES FAIL COURT

Helen Morgan and Others Named in New Warrants; Texas Guinan Posts Bail

NEW YORK, Aug. 6. (AP)—Warrants for Miss Helen Morgan, nightclub hostess, and about sixty-five others, including Miss T. Granelund, radio announcer of station WJLN and master of ceremonies at the Privilege Club, were issued today when they failed to appear in Federal Court to answer indictments charging them with conspiracy to violate the Volstead law and maintaining nuisances. J. Arthur Adler, counsel for the group, agreed to shepherd them into court before Friday and service of the warrants was held up.

Texas Guinan, hostess at the Elton Royale, and Miss Loretta McDermott, hostess at a club named for her, appeared with two scores of other persons of the 136 indicted last week. The hostesses were released in \$1000 bail. No date for trial was fixed.

MEXICO CLAIMS SETTLED
GENEVA, Aug. 6. (AP)—Agreement between Germany and Mexico concerning claims of citizens of the former country for damages in connection with the last Mexican revolution, was registered with the League of Nations today.

Wilbur Cites Enlisted Duo for Heroism

WASHINGTON, July 6. (AP)—Secretary Wilbur today commended two enlisted men for heroic conduct and recommended that they be awarded life-saving medals by the Secretary of the Treasury.

Benjamin E. Scott, fireman aboard the mine sweeper Gannet, was commended for the rescue of Ralph H. Post of San Diego, Cal., when his automobile plunged off a pier on April 6. Scott then recovered the body of a woman who was drowned in the automobile. Scott lives at 404 Del Monte street, Pasadena, Cal. Andre F. Walker, machinist's mate, attached to the submarine O-4, was commended for rescuing a Japanese sailor of the steamship Kanyo Maru who fell from a pier at Balboa, Canal Zone, March 25. Walker lives at St. Joseph, Mo.

DAILY FLIGHTS START

Passenger Service Installed From New York to Washington

NEW YORK, Aug. 6. (AP)—Daily airplane service from New York to Washington was announced today in advertisements by the United States Air Transport, Inc.

The fare of \$60 is somewhat more than three times railroad fare while the schedule time, two hours and fifteen minutes, is about half what it takes to make the journey by train.

Planes in the service are to be Ryan biplanes, sister ships to the services were being conducted for Spirit of St. Louis, designed to carry four passengers and express.

ACTRESS OF SCREEN AND STAGE DIES

Prolonged Sickness Ends Career of Corinne Barker, Hobart Henley's ex-Wife

NEW YORK, Aug. 6. (AP)—Corinne Barker, 35 years of age, stage and screen actress, died today after an operation in Mt. Sinai Hospital. She had been ill a year.

Miss Barker, who formerly was the wife of Hobart Henley, motion picture director, originally was from Portland, Or.

She appeared on the stage in "Whirly Kay" with Elsie Ferguson and in many other plays, including "Remnant," "The Squab Farm," "Abe and Mawruss" and "On With the Dance."

Divorcee Sues Death-Bed Wife

INDIANAPOLIS, Aug. 6. (AP)—Lucille Mammitt Allison, to whom James A. Allison, Indianapolis capitalist, was married five days before his death, was made defendant in a \$2,000,000 damage suit filed today by Sara Allison, his divorced wife.

The suit was filed while funeral services were being conducted for Allison. Allegations of Allison's afflictions is asserted.

If There Are More Than Three in Your Family

A roadster or coupe does well enough for two but when there are four or more in the family, you want a sedan.

A small sized General Electric Refrigerator is adequate for a family of two or three, but if your household contains more, you'll want Model 95. It is exceptionally roomy yet occupies small floor space. It provides that surplus of food space so desirable when there are guests or a party, or food to be considered over the week-end. It makes available at one time 28 pounds of ice cubes.

Like all General Electric Refrigerators it is "years ahead" in design—different from all other makes. It is entirely automatic, completely worry-proof. All its mechanism is up on top and sealed in an

air-tight steel casing, forever free from dirt and difficulties. You don't even ever oil it.

It is the easiest to keep clean for two reasons—it stands on legs with ample "broom-room" underneath and the hermetically-sealed unit on top keeps all the oil inside with the mechanism, while radiation through the coils causes a constant upward air current which prevents dust from settling.

Easy to Own

Seventy-two Dollars (\$72.00) places this large refrigerator in your home. The balance can be easily paid in small monthly payments. The smaller model to the left for families of two or three requires a down payment of only \$44.00.

Make this lifetime investment in healthful living. Enjoy all the conveniences which this modern electrical servant brings. Visit one of the stores listed below and actually see what a General Electric can mean to your home and family.

Help Our Farmers and Aid Yourself Eat More Fruits and Vegetables And Assist in Relieving the Surplus of These Products

The Safeway Stores do not consider themselves merely merchants in the distribution of food products, but a civic institution having the prosperity of each community in which they operate, at heart.

Let's double the consumption of Fruits and Vegetables now. By helping yourself, you can aid the farmer. California is suffering from an overproduction of Fruits and Vegetables, and it is not only the duty of Safeway Stores, but we hope it will be the purpose of every resident of Southern California to aid in the consumption, canning and preserving of these food stuffs, as it will greatly aid the future prosperity of this community.

franchises as they expire and con-
tinued operation under revocable

WHEN OIL AND WATER DO MIX, THEY STAY MIXED, SAYS EXPERT

CHICAGO, Aug. 6. (AP)—Oil and
water do mix, and they mix so thor-
oughly that they have cost Ameri-
can Petroleum Producers more than
\$100,000,000, Dr. Gustav Egloff, Chi-
cago chemist, today told the Ameri-
can Chemical Society Institute at
Northwestern University.

Nature every year burdens the
oil industry with more than 300,000-
000 barrels of intimately mixed oil
and water as emulsified crude oil,"
declared Dr. Egloff. "Such oil does
not separate its water even after
years of storage."

At the present time there are
more than 100,000,000 barrels of
emulsified crude oil in storage tanks.
More than \$100,000,000 is tied up in
stored emulsified oil for whose utili-

sation no really economical method
has been evolved.

Dr. Egloff explained that no the-
ory has ever been given to explain
the cause of emulsified oils. Some
emulsions have water in fine drop-
lets dispersed through the oil, mak-
ing up 95 per cent of the total.
Chemists still are unable to separate
the oil from the water.

Improvements in refinery tech-
nology have resulted in an annual
saving of \$500,000,000, most of which
has been passed on to the public in
the form of cheaper gasoline, said
Dr. Egloff.

Research in petroleum and re-
fining has resulted in motor fuel of
greater power, better cracking pro-
cesses, better lubricants at lower
cost and the discovery of new oil
deposits, he declared.

seems to me somebody is in too big
a hurry.

"We should at least be given the
courtesy of knowing what it is all
about," asserted Supervisor McShee-
ly. "This ignoring of the board
looks sinister to me."

The public utilities committee as
a body, after conference with City
Attorney O'Toole, issued a formal
statement, declaring "several objec-
tions are seen to the plan, chief of
which is that it seemingly obli-
gates the municipality to take over
all private lines upon the expira-
tion of franchises whether or not
the lines would be economical to
operate or be a duplication of pre-
sent facilities of the municipal rail-
way."

BALLOT SOLICITED

At the same time, circulators ap-
peared on the streets soliciting sig-
natures to a petition to place the
charter amendment matter on the
November general election ballot.

"This action in itself drew the fire
of some Supervisors as the votes of
six of them would be sufficient to
have the resolution placed on the
ballot without recourse to an initia-
tive and it was felt the Supervisors
were being ignored."

Joseph M. Cumming, secretary of
the Downtown Association, denied
any intent to ignore the Supervisors
but said: "Realizing the need of
haste as there is not much time to
get this matter on the ballot, we
decided to go ahead at once with
the petition. We did not know the
attitude of the Supervisors and
thought it safer to get out a peti-
tion. If the Supervisors will con-
sider the matter so much the bet-
ter."

The Supervisors today, however,
considered the matter principally
from the standpoint of the haste
Cumming mentioned.

HURRY OFFENDS

"Why all the hurry?" demanded
Supervisor Shannon. "We are now
going ahead with the valuation of
the Market Street Railway Com-
pany's properties. While there may
be merit in the proposed plan, it

seems to me somebody is in too big
a hurry."

"We should at least be given the
courtesy of knowing what it is all
about," asserted Supervisor McShee-
ly. "This ignoring of the board
looks sinister to me."

The public utilities committee as
a body, after conference with City
Attorney O'Toole, issued a formal
statement, declaring "several objec-
tions are seen to the plan, chief of
which is that it seemingly obli-
gates the municipality to take over

Auction Supreme

A Country House in the Heart of
the City and Exquisite Furnishings
HOME OF MARY O'HARA

WELL KNOWN SCREEN WRITER (in private life, Mrs. Sture-Vasa.)

REAL ESTATE will be sold
Wednesday, Aug. 8th
at 10 A.M.

FURNITURE will be sold by the piece
Wednesday, Aug. 8th, 11 a. m. and 7:30 p. m.
and Thursday, Aug. 9th at 11 a.m.

201 NORTH ROSSMORE AVE.

Grounds 100x200 Feet

2 doors south of Beverly Boulevard

REAL ESTATE

This house is on Rossmore Avenue,
one of the finest residential streets in
the city, surrounded by magnificent
grounds, situated amidst beautiful
grounds, and a main artery connect-
ing Rossmore with Vine Street, which
is a direct thoroughfare to the center
of Hollywood; but its real frontage
is to the rear, on the Wilshire Coun-
try Club Golf Links. In fact, a sliced
shot to the ninth green is very likely to drop into Miss
O'Hara's Lily Pond. Golfers take notice! A door through
the wall of the garden leads directly on the links! Nine
holes after business and before dinner becomes easy and
practical.

So, if you are a golfer, you will be interested in this house on
account of its link-side location.

If you like class, you will be interested in the high quality
of the design and construction of this superb residence, its
exclusive location and its fine gardens and views.

If you like atmosphere, you will find here an artistic and
original quality which is rare—great charm and refinement.

If you are cosmopolitan, and like your Americanism
flavored with European culture and taste, you will
find it here.

FURNISHINGS

The gorgeous furnishings are in true
keeping with this beautiful home; it
is almost impossible to describe their
grandeur in pen and ink; each piece
has been selected and has that touch
of individuality that will add charm
to any home. The floors are covered
with Oriental rugs which include
many antique pieces in addition to
some exquisite large size Oriental
carpets. Rare Paintings
and Art Objects, Wm. Knabe Ampico Grand Piano, Reception
Hall China Clock, exquisite Combination Cabinet, RCA
Radio and Panatrop, period furniture and numerous mag-
nificent miscellaneous pieces. On account of the magnitude
of this sale, the furnishings will be sold Wednesday all day
and evening and continuing Thursday, beginning at 11 A.M.

An Added Achievement to 32 Years of Success

Huntington Palisades "On Santa Monica Bay"

SINCE 1896 the Santa Monica
Land & Water Company has
adhered to its belief that the
Santa Monica Bay Region was destined
to be the exclusive residential district
of Los Angeles—and it is!

Numerous beautifully developed prop-
erties on Santa Monica Bay attest to
the successful and careful policy of up-
building adhered to by this company
over a period of 32 years.

As the crowning achievement to its
long record of success, the Santa
Monica Land & Water Company re-
cently acquired HUNTINGTON PAL-
ISADES—the long-sought-after, tree-
covered mesa overlooking Santa Mon-
ica Bay which had
been held intact for
more than 30 years by
the Huntington Es-
tate.

More than \$1,000,000 has since been
spent on its beautification and improve-
ment—the tremendous resources of the
company have been put squarely behind
it. It is being developed as one of the
finest residential properties in the West.

Only the strong financial position of the
company makes it possible to offer these
marvelous, exclusive homesites at such
moderate prices as now prevail at
HUNTINGTON PALISADES. There
is no desire to make abnormal profits.
Only a fair interest return on the in-
vestment is expected.

Nowhere else can you buy such in-
trinsically valuable property as is offered
you NOW in HUNTINGTON PAL-
ISADES—backed by a concern with
such a continuous record of success, of
such long experience, of such sound
reputation and of such financial strength.
You owe it to yourself to investigate
this opportunity today—for investment
or for your home place.

POLE AIR TO BE STUDIED

Metological Tests Will be Made by Wilkins
Hopes to Find Out
Nature of Conditions

Looks After Radio
Set in Bay City

FRANCISCO, Aug. 6. (AP)—George Hubert Wilkins, known to Americans as Capt. Wilkins, plans a series of meteorological tests in addition to his study of South-Pole geography and during his forthcoming Antarctic exploration trip.

Wilkins will have to do work in ice and fog conditions. Data will be tabulated in as minute detail as possible from the stand-point of the reason for the weather and weather conditions.

The expedition's four airplanes will be used in this work. He will be in his 2000-mile flight from Graham's station.

Wilkins said he came here to get acquainted with the radio equipment. It is being manufactured by the Southern Cross on its trip over the North pole.

Wilkins said he came here to get acquainted with the radio equipment. It is being manufactured by the Southern Cross on its trip over the North pole.

CHEST BODY GIVES PLANS AT SESSION

Five Hundred Gather for
Outlining Project to be
Carried Out in City

An important meeting of the Community Chest Agency Co-operative Committee was held last night in Patriotic Hall, at which about 500 people representing every element in the city, officers of the Community Chest, executives and workers of the different social service institutions were present.

I. Irving Lipseth, executive director of the Federation of Jewish Welfare Organizations, and chairman of the Agency Co-operative Committee presided. He outlined briefly the two existing conceptions in Community Chest organization, one, the social agencies reaching the conclusion that it is to the best interests of the work in which they are engaged to raise funds necessary for their maintenance jointly rather than in competition with one another and the other that of a super-structure determining that for the benefit of the community as a whole, it is advisable that a fund be raised, the proceeds of which shall be distributed among the social welfare organizations which have affiliated with the funds.

J. A. Kerr, vice-president of the Security Bank and campaign chairman of the Community Chest for 1928, outlined in detail the preparations being made by the campaign committee for the 1928 campaign. D. C. MacWaters, newly appointed secretary and general manager of the Community Chest, called the only dollar a year executive in that capacity, pointed out the willingness of the agencies to co-operate with the board of directors in any financial and other emergencies. He expressed the belief that the same whole-hearted co-operation that has characterized their efforts in the past would be continually manifest.

Among those present were Ben R. Meyer, Joseph Scott, Victor H. Rossett, Edwin A. Meserve, Mrs. Susan Dorsey, W. L. Hunt, J. A. H. Kerr, Larry H. Wood, F. L. E. Harman, Frank R. Schafer, Helen Matheson, Louis Laughlin, Louis Nordlinger, Dr. D. W. Edelman, Harry F. Henderson, Dan B. Miller, J. G. Warren and Mrs. Chester C. Ashley.

PASADENA WARNED ON DAM PLANS

Palm Canyon Plan Called
Unsafe by Flood-Control
Engineer at Gathering

PASADENA, Aug. 6.—Warning that the proposed Palm Canyon dam site to provide water for Pasadena is unsafe, was sounded by James W. Reagan, consulting engineer, county flood control, in an address tonight before the Metropolitan Business Men's Association in the Woodrow Wilson Junior High School.

Reagan declared that there are two faults of soft rock, similar to those surrounding the defective St. Francis dam site, in the geologic formation of Palm Canyon, located six miles below the giant county flood-control dam in San Gabriel Canyon.

Pasadena, if the \$8,000,000 dam and pipe-line project is placed on the ballot and results in a favorable vote, will be spending needless money, Reagan pointed out. He offered the suggestion that one well for each 100-acre section be sunk, being positive that the so-called water problem of Pasadena can be solved in this way.

Franklin Thomas, former professor at the California Institute of Technology and former member of the Pasadena Board of Directors, read reports from two professors of the local college, Dr. F. L. Ransome and Dr. J. P. Burdick. Both reports favored the Palm Canyon project to a moderate degree, calling the dam site "good, but not ideal."

DRUNKS TAX PATIENCE OF CITY POLICE

One Woman Among Dozen
Taken for Driving Cars
While Intoxicated

Georgia-street Receiving Hospital and police station were taxed to capacity last night to such an extent that attendants became bored with the continuous calls from victims of those who are asserted to have indulged in too much holiday spirits. Twelve persons were booked for drunk driving or just plain intoxication.

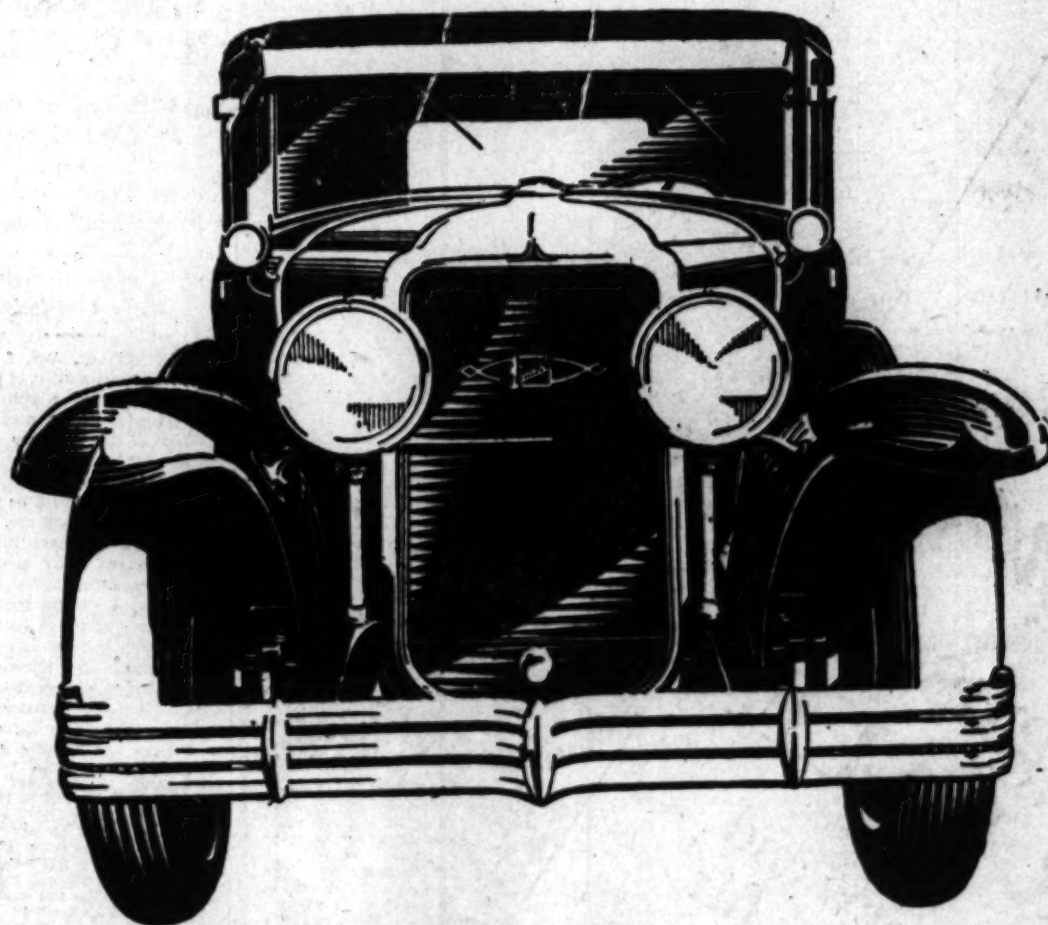

Mrs. Rhea McDonald, 31 years of age, of 1528 North Hobart Boulevard, parked her car at Sunset Boulevard and Wilcox avenue. The car started backward and she couldn't stop it. At Sunset and Bronson she collided with a stage operated by the Motor Transit Company. Mr. and Mrs. Rex Miller were taken to the Dickey & Case Hospital in Hollywood suffering from bruises and other injuries. Mrs. McDonald was booked at the Hollywood police station charged with drunk driving.

Police announced last night that the campaign against drivers of automobiles while under the influence of intoxicating liquors will be carried on vigorously.

Lost Inca City Comes to Light

LIMA (Peru) Aug. 6. (AP)—Discovery of another lost city of the Incas is reported in a telegram from the Prefect of the Department of Cuzco to President Leguia.

The ruined city is Huainapichco. It is near the town of Machupiccho, which was discovered sixteen years ago by a group of American and Peruvian scientists.

EXTRA SESSION MAY BE CALLED

March Meeting of Congress
Regarded Probable

Leaders Point to Necessity
for Tariff Action

Both Parties Favorable to
Early Legislation

WASHINGTON, Aug. 6. (Exclu-
sive)—A special session of Congress
immediately after March 4, next,
is regarded here as probable re-
gardless of the outcome of the
Presidential election.

The main purpose of the ses-
sion, it is believed, will be tariff re-
vision to aid agriculture. A side
object will be to have the Senate
on the job to ratify nominations.
A new President always likes to
have his appointments confirmed as
quickly as possible so that he can
put his own policies into effect in
the administrative branch of the
government unhampered by delays.

Both parties are anxious that it be
developed already in the campaign
to remedy any existing defects in
the tariff schedules and they are
particularly concerned about
changes that might be made that
would work ineffectively with farm
relief. According to reports reach-
ing Washington from Palo Alto,
Herbert Hoover already has decided
that if elected he will call an ex-
tra session of the national Legisla-
ture to deal with tariff revision and,
perhaps, also tackle direct farm re-
lief legislation.

SMITH'S REPUDIATION

Incidentally, Gov. Smith's flat re-
pudiation of the equalization prin-
ciple is reassuring the Republi-
can leaders. They say it removes
the farm question from the list of
issues and leaves it to Hoover to
announce a workable program of
relief. Smith virtually has an-
nounced he will offer no remedy in
his acceptance or other campaign
speeches, while Mr. Hoover, it is
indicated, may come out in his
speech next Saturday with a con-
crete proposal for relieving agri-
cultural distress and if he does,
observers agree, it will not shut
out all talk of Republican revolt
in the farm belt.

Senator Joseph of Utah, chair-
man of the Finance Committee;
Senator Jones of Washington, head
of the Commerce Committee, and
mentioned for Senate Republican
leader, and Fletcher, Democrat of
Florida, all agreed today in infor-
mal statements that a special ses-
sion of Congress will be necessary
following the inauguration of a new
President, March 4, next.

Smoot said he is "not certain"
an extra session will be called but
he forces "the necessity for tariff
revision, although that necessity
may not be pressing until the Sev-
enty-first Congress meets at the
time appointed by the Constitu-
tion."

FAVORED BY SENATORS
Senator Jones, who said he has
not consulted with either Smoot
or Fletcher, declared, "If we are go-
ing to have a tariff revision we
ought to have it at an extra ses-
sion. The session beginning next
December and ending March 4, will
be too short to attempt it. The
work should be undertaken at an
extra session which should be called,
in my opinion, shortly after March
4. Both major parties have prom-
ised revision on the tariff."

"The extra session, I believe,
should be called about April, 1932.
I do not care to say at this time
just how far or in what direction
the revision should be undertaken,
beyond the general statement that
the tariff should be revised and that
it should be revised especially with
reference to agriculture. There
should be an increase in the tariff
on agricultural products on grains
and other products of the farm
brought in from abroad."

FORWARD LOOKING

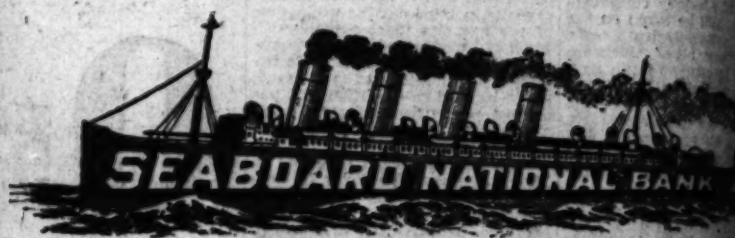

F. H. OSLER
Director

The thing about the Sea-
board National Bank that
attracted me was its definite
plans for advancement and
constructive building, cov-
ering a ten to fifteen year
program. No architect's
plans could be more com-
plete.

A solid rock foundation, di-
rected by the policies of
conservatism and economic experience, has
been laid, and this foundation will well carry
the expansion program recently announced.

The Seaboard National Bank is in a position
to render attractive and profitable co-opera-
tion to those business concerns and individ-
uals who also have a definite, aggressive, con-
servative program of building.

come taxes, etc.,
ing the necessiti
watching the mar
of securities and
erations of their re
tions.

A Word to Investors Who Experiment

The next thing to out and out speculation is experimental investing. By this we mean the buying of all sorts of securities for purposes of diversification.

The investor who purchases an unnecessarily wide range of securities is not only experimenting, but is also complicating his estate in a manner that requires constant care. At the same time he is increasing the danger of acquiring unprofitable investments, thus defeating the very object for which he strives, namely, minimized risk.

Many people are misled by the old maxim which advises against putting "too many eggs in one basket." In their effort to follow this advice they go to an unreasonable extreme, buying a little of everything that is offered until their holdings include about every type of investment in existence—good, bad and indifferent. Even the estates of many experienced investors include a surprising percentage of securities which can be liquidated only at serious sacrifice.

Andrew Carnegie, one of the shrewdest financiers of all time, once advised: "Put all your eggs in one basket and then watch the basket." That advice doubtless was given with certain qualifications, and was not intended to apply to all cases. Nevertheless it indicates a very definite and very sound opinion against haphazard diversification.

THE ADVANTAGES OF CONCENTRATED INVESTMENT

Obviously, there are important advantages to be gained in concentrating your funds in one form of investment, provided there is no sacrifice of safety in so doing.

It greatly simplifies the whole situation in relation to the keeping of records and the computing of income taxes, etc., as well as obviating the necessity of constantly watching the market on a long list of securities and following the operations of their respective corporations.

In order to enjoy these advantages, however, it is necessary to select the *right form of investment*; one which embodies the principles of practical diversification coupled with sound security and every other desirable factor.

All of these factors are provided in the Insured First Mortgage Certificates of the Mortgage Guarantee Company which are obtainable in convenient denominations, in one to five-year maturities, to yield 5% to 5½%.

These Certificates represent pro rata interests in a multiplicity of first liens on select, improved real estate in many different communities of California. The principles of diversification are therefore carried to their limit of practicability. However, if the investor should desire even greater diversification for the investment of any considerable amount of money, his funds may be divided among several of the hundred or more series of these Certificates which the Company has in trust.

SECURITY

Another important feature is the fact that the insured value of the underlying liens can not, in any instance, exceed 50% of the appraisal values of the improved real estate which is pledged as security. These values are established under a very conservative system of operation, by State-approved appraisers, checked by the Company's own experts, and filed with the State Insurance Department.

Hence these Certificates have back of them the soundest form of security known, namely, improved real estate diversified as to both territory and classification, and always of a valuation more than double the total face value of the Certificates outstanding.

INSURANCE

Over and above everything else is the insurance of both principal and interest, issued by this Company under the Mortgage Insurance Act of California. Back of this insurance are resources of \$70,000,000 and fifteen years of suc-

cessful experience in the execution of insured mortgage loans.

CARE-FREE

When the Mortgage Guarantee Company puts its policy of mortgage insurance on your investment, it means that every dollar of its capital, surplus and undivided profit stands as your safeguard in addition to everything else; and when an institution of this strength is back of your investment it brings you the peace of mind and freedom from care that cannot be measured in dollars and cents.

As a holder of these Certificates you have absolutely none of the cares and responsibilities of the owner of individual Mortgages, and yet you have even better security, plus the insurance of both principal and interest. Supervision of the pledged properties and all legal and technical details are attended to by the Company. Even the trouble of clipping coupons is eliminated. Interest checks are mailed either quarterly or semi-annually as desired.

THE SOLUTION

If you, like many other investors, have been wondering how to place your funds to advantage under present market conditions, we suggest that you investigate at once the pronounced advantages offered by the Insured First Mortgage Certificates of the Mortgage Guarantee Company, including:

*Safety of Principal
Certainty of Income
Freedom from Market Influences
Exemption from all California Taxes
Convenient Denominations
Optional Interest Dates
Choice of Maturities
Re-Investment Privileges
Liquidation Provisions for Estates
Legality for Trust Funds, Banks, Insurance Companies, etc.*

SALES EXECUTIVE of Unusual Ability AVAILABLE

We are in touch with a man of unusual sales ability—not only as a personal salesman, but more especially as an organizer and manager of a smoothly functioning and efficiently working sales department. He is a man of very high calibre, a real business executive with a record of past accomplishment to which he can proudly point. He is a fine man to work with and work for. He has made a name for himself in two totally different industries as an executive of energy, infectious enthusiasm and practical merchandising ideas.

This man will be a valuable asset to any manufacturer who needs a man to stimulate his sales and to build up and maintain a sales department. His present connection is one of importance and responsibility. He is accustomed to a good income and has earned it.

We commend him to any manufacturer interested in promoting sales on a large scale for a sound product.

LOS ANGELES EXCHANGE

Strong Undertone Characterizes Active Oil-Stock Trading in Local Market

Richfield Oil with Union of California were the outstanding traders on the resumption of the week's operations yesterday on the Los Angeles Stock Exchange. Trading throughout the market was a more active pace than was manifest in any day of the past week with the oil-stock trading unusually brisk. Bank stocks, though strong in the earlier part of the session presented a spotty appearance at the close.

Richfield, opening up 1-4 to 48, strong spot and marked a new high at 49 1-2. It closed at 49 1-2. Los Angeles-First National was active, but fell off a point to 11 1-2. Bancitaly Corporation gained 1-4 to 114 1-4, while Bank of Italy lost a like amount to 175 1-2 after touching 177 at the opening. Merchants' National slumped 9 points from its last sale Friday to a low for the day at 191. It rallied to close at 196. California Bank was unchanged at 125. Stock transfers totaled \$3,549 shares. Bond transactions amounted to \$6000.

WALL STREET PARAGRAPHS

(Copyright, 1928, New York Tribune Press, Inc.)

NEW YORK, Aug. 6.—Consolidation of four important factors in the place-dyeing and printing fields to form the Associated Dyeing and Printing Corporation was effected recently through the sale of an issue of \$2,750,000 ten-year 6 per cent notes and a block of capital stock.

Organization of this company is indicative of the trend not only in its particular field, but also in other lines of business, for it represents a step toward reduction of operating costs, thus effecting savings for consumers and increasing earnings. The combination will be able to render a complete dyeing and printing service in unusually fast time, it is believed.

Four plants in Paterson, N. J., are owned, including the large plant for expansion. Water facilities, an important factor in this industry, are considered highly favorable in aiding operations for the rise in selected shares. The lower renewal figure was interpreted as offering a further drop in price during the day. But banks took the market in the early hours, while the supply was ample at the opening figure, pressure of offerings was not sufficient to bring any change in the rate.

DURANT GOING ABOARD AGAIN

Taken as concrete evidence of a further drop in price during the day, the market in the early hours, while the supply was ample at the opening figure, pressure of offerings was not sufficient to bring any change in the rate.

Money Rate Spurs

Filing of the renewal figure for call loans at 10 per cent, with Friday's closing rate of 6 1/2 per cent and the renewal figure of 7 per cent posted on that day, was effective in aiding operations for the rise in selected shares.

NEW TALKING IN WHEAT

Sentiment in grain circles is momentarily diametrically opposite of that prevailing several months ago. When July wheat staged its spectacular spring rise to well above \$1.70 a bushel some six weeks or so back, the trade was talking most of all about the possibility of a freely made that \$2 wheat was a certainty. Splendid growing weather, however, which during the interim had changed drastically, was the outlook for the crop, particularly as regards Canadian production, was naturally brought to a distinct check, and the market was breaking to new season lows today the \$2 prediction was wont to give way to suggestions of \$1 wheat.

PRODUCE MARKET

(United States Bureau of Markets)

Local market for produce is quiet, with a few small changes in price. Apples, pears, and peaches are in season, but prices are generally higher than last year.

The Lancer
Harry's Care
On a meek and respectable town Los Angeles manages to produce the weirdest murder of any place on the civilized globe.
I think this is partly due to the fact that the city is so well advertised. People who find it convenient to leave the old home town for one reason or another, come here as an attractive place in which to lose themselves.
JIMMIE
Jimmie Walker, the peripatetic Mayor of New York, says he found the Pacific Coast all lined up for Al Smith.
But the trouble with Jimmie's diagnosis is that he never got up in time to consult anybody but the night waiters.
A
Wireless has displaced the mysterious system of signals by which the wild African tribes signaled to each other at an incredible rate of speed.
Personally, I don't believe it was done with drums. The scientists who have given the most study says it was a system very much like a crude radio, whereby the natives found a way to receive distant vibrations as they struck lakes and ponds.
Whatever the correct explanation, it is a strange mystery. Jimmie Walker told me that he once made a long voyage down the Colorado River in a flatboat. He knew that no one had passed him on the river, and that passage by land was impossible. Yet when he met the Indians far down the river they knew all about him and his reason for coming.
RASTUS KNEW BETTER
Liver has suddenly risen from the status of dog meat to food for the elect. More than five years ago the doctors were warning us that this meat was the sink of the system, and that to eat it was just a short way to suicide.
All of which brings to the layman the impression that what doctors know about the human system could be strained through a sieve finer in mesh than the liver.
TITLES COME BACK
All the hot-dog titles of nobility and the stars and the garters and decorations are going back in Czechoslovakia again.
They have a distinct use for them. Much consolation for poor pay and impoverished living which is the lot of men of white-collar occupations in Central Europe is saved by giving them high-sounding monikers.
The fortunate wives of scientists are willing to get along on cabbage soup for some time if they are given the title of "Professor's Wife."
Born - Very - Real - Counselor Schmidt. And thereby upstage the other girls.
BOOZE IS DEAD
The liquor traffic has received a death blow in Chicago. The police have prohibited the inhabitants from singing "Sweet Adeline" after midnight.
AT THE EXPOSITION
One of the kids I got out of the Long Beach exposition is the model of that old Dutch fishing boat in the Holland Building. It is so round and tubby that it looks like a floating stool. It has neither centerboard nor keel; but on each side two huge fins which are lowered as the boat backs through the shallow waters of the Dutch coast.
Another big point of interest to me is the Italian exhibit with its centuries-old furniture. These old designers the time of Benvenuto Cellini had a gorgeous knowledge of line and proportion. It had a richness and charm that no furniture designer since has been able to achieve.

MORNING.

OFFICER KILLING SUSPECT TAKEN

San Authorities Report
Arrest of Hints

H. Carter Shot as He
Questions Pair

Persons Discovered Still
Alive by Newsboys

Walt, suspected of shoot-
ing Officer James H. Carter
at 11th and Grand streets
last night, was taken to the
Los Angeles County Jail, of this
city, according to a war-
rent issued by the police depart-
ment yesterday.

Walt was shot while questioning
a pair of men in the morning. Car-
ter was shot when discovered by
newsboys, who put in a call
to the police.

He died shortly after.

"LOVE ME, LOVE MY BIRD," SHE SAID

Marjorie Jane Lambert

"No bird, no go," was 5-year-old
Marjorie Jane Lambert's ultimatum,
when Mr. and Mrs. Gerald Lambert
sought to leave in Peru Marjorie's
parakeet, Loreka, on the trip to
visit the child's grandmother in
Santa Monica.

And Marjorie, being boss of the
household, the parakeet arrived
along with the family and luggage
on the Dollar liner President Wil-
son yesterday.

"It can't sing or do things, but I
love him," explained the little miss.
She and her mother will visit on the
coast while Mr. Lambert will pro-
ceed to Bartlesville, Okla., to report
his Peruvian investigations to the
Phillips Petroleum Company.

Opposition to the female doctor
is so strong in England that three
hospitals in London have refused
to continue training women stu-
dents.

Word was received yesterday from
York, Pa., saying that Beitzel's
older brother, a York restaurant
owner, has taken steps to employ
counsel for Beitzel. The brother
stated that Beitzel was a "good
man" and that his derelictions ap-
peared only after his neck was in-
jured in an airplane accident.

The inquest at the Van Nuys
undertaking parlors brought forth
the story of Barbara Mauer as the
neighbors knew her, living as the
wife of Beitzel under the name of
Barholme, at 841 Golden avenue.
The young couple resided there only
a few months, but Barbara as every-
one called her, was well liked ap-
parently by all who came in con-
tact with her. She was to have be-
come a mother in the latter part of
July and she was very happy, as
Mrs. Mae Burns explained it. Mrs.
Burns, who is a real maid at the
Biltmore, occupied an adjoining
apartment and visited with Bar-
bara every night.

Witnesses said
"Why—she was my friend!" Mrs.
Burns testified on the witness stand
and then she broke down, wept and
sobbed.

Regarding her composure she told
how she would sit with the happy
young girl who had collected a com-
plete layette for her coming baby.
"But I didn't know Mr. Beitzel was
very well," she explained. "You
know, she was always so happy with
him that when he came home I al-
ways went away so they could be
together."

And then there was Mrs. Morris
Allen, who lived in another apart-
ment across the courtyard. She also
told how happy Barbara was, with
a cheerful word to everybody, serv-
ing baby clothes, fixing up the
apartment, planting flowers in boxes
to be all pretty when baby came—
and just happy.

It was Mrs. Allen who said she
saw the pair drive off in a rented
roadster Sunday morning, June 24,
last. And he came back alone, did
"Mr. Barholme" and Mrs. Allen
heard him in the apartment the
next day or so whistling and wrap-
ping up bundles. It was the cloth-
ing of his common-law wife that
Beitzel wrapped up and sent to re-
fugees in Phoenix, Ariz.

The clothes were recovered by the
police yesterday.

TELLS OF RETURN
Mrs. C. Thompson also told of the
happy young expectant mother and
of the Sunday ride and of Beitzel's
return alone. He told Mrs. Thomp-
son that she had said "good-by" to
Barbara. "Why, no," was the
neighbor's reply, "she has not left,
has she?" And he told her that
Barbara had gone east to his aunt.

There was Nicholas Mitchell, the
grocer. She came to his store two
and three times a day, talked a lot
with his wife and was happy. She
got a kitten from Mitchell a week
before she disappeared, and a week
after she disappeared Beitzel
brought the kitten back, explaining
his wife had gone east.

It developed from the autopsy re-
port that near the spot where the
body was found there also was
found some partly formed
bones of an infant. This is one of
the most important bits of evidence
tending definitely to establish the
identity of the body. The chief
purpose yesterday was to establish
this identity and the cause of
death. All of those testifying yes-
terday knew the young woman
and who viewed the remains said
that in their opinion it was her body
as nearly as could be determined.

LOOK AT FISTOL
Mrs. Burns also related how she
and the young woman looked for
the number on the pistol which Beitzel
had when he called up a few days
prior to the automobile ride to ask
Barbara to tell him the number so
he could purchase the proper shell.

Throughout the inquest, which
was conducted by Deputy Coroner
Monfort, Beitzel sat apparently un-
moved, except when the woman on
the stand broke down and cried.
Asked if he wished to testify he said
that inasmuch as he felt that he
would rather not.

The police announced yesterday
that a butcher knife had been found
in the door pocket of the roadster
rented by Beitzel.

The three bundles of clothing were
returned from Phoenix to Chief of
Detectives Cline and identified by
Beitzel as clothes of Miss Mauer's.
He had sent away. He explained
that he merely wanted to get rid of
them, believing she had left him for
good.

When her husband was stricken
ill and compelled to cease cam-
paigning for the Democratic nomi-
nation for Governor in Missouri,
Mrs. Frances M. Wilson took the
stump in his behalf.

MAUGER DEATH BLAME UNFIXED

Open Verdict Returned as to
Girl's Slayer

Beitzel May be Charged With
Murder Today

Friends and Neighbors Talk
at Inquest

After hearing from some of the
woman neighbors who talked to her
across the fence and the grocer who
waited on her at the owner gro-
cery and the ranger who found her
body in the brush, a Coroner's jury
yesterday returned an "open" ver-
dict in the case of Barbara Mauer,
on suspicion of whose murder Rus-
sell Beitzel is being held by the po-
lice.

The jury found that Miss Mauer
had come to her death from a bullet
wound at the hands of an uniden-
tified person with homicidal intent,
and investigated further investiga-
tion.

Following the inquest Detective-
Lieutenants Condafer and Bander-
son conferred with Dep. Dist. Atty.
Thoms relative to obtaining a com-
plaint against Beitzel formally
charging him with murder. Thoms
announced that such a complaint
may be issued today.

FLAY OTHER CHARGES
It was intimated the authorities
are considering a possibility of in-
cluding an additional charge cov-
ering the death of the unborn child
of the young woman.

At 10 o'clock this morning a hear-
ing will be had before Superior
Judge Edmonds on a writ of habeas
corpus, through which Attorney
Hamilton is seeking the release of
Beitzel.

Word was received yesterday from
York, Pa., saying that Beitzel's
older brother, a York restaurant
owner, has taken steps to employ
counsel for Beitzel. The brother
stated that Beitzel was a "good
man" and that his derelictions ap-
peared only after his neck was in-
jured in an airplane accident.

The inquest at the Van Nuys
undertaking parlors brought forth
the story of Barbara Mauer as the
neighbors knew her, living as the
wife of Beitzel under the name of
Barholme, at 841 Golden avenue.
The young couple resided there only
a few months, but Barbara as every-
one called her, was well liked ap-
parently by all who came in con-
tact with her. She was to have be-
come a mother in the latter part of
July and she was very happy, as
Mrs. Mae Burns explained it. Mrs.
Burns, who is a real maid at the
Biltmore, occupied an adjoining
apartment and visited with Bar-
bara every night.

Witnesses said
"Why—she was my friend!" Mrs.
Burns testified on the witness stand
and then she broke down, wept and
sobbed.

Regarding her composure she told
how she would sit with the happy
young girl who had collected a com-
plete layette for her coming baby.
"But I didn't know Mr. Beitzel was
very well," she explained. "You
know, she was always so happy with
him that when he came home I al-
ways went away so they could be
together."

And then there was Mrs. Morris
Allen, who lived in another apart-
ment across the courtyard. She also
told how happy Barbara was, with
a cheerful word to everybody, serv-
ing baby clothes, fixing up the
apartment, planting flowers in boxes
to be all pretty when baby came—
and just happy.

It was Mrs. Allen who said she
saw the pair drive off in a rented
roadster Sunday morning, June 24,
last. And he came back alone, did
"Mr. Barholme" and Mrs. Allen
heard him in the apartment the
next day or so whistling and wrap-
ping up bundles. It was the cloth-
ing of his common-law wife that
Beitzel wrapped up and sent to re-
fugees in Phoenix, Ariz.

The clothes were recovered by the
police yesterday.

TELLS OF RETURN
Mrs. C. Thompson also told of the
happy young expectant mother and
of the Sunday ride and of Beitzel's
return alone. He told Mrs. Thomp-
son that she had said "good-by" to
Barbara. "Why, no," was the
neighbor's reply, "she has not left,
has she?" And he told her that
Barbara had gone east to his aunt.

There was Nicholas Mitchell, the
grocer. She came to his store two
and three times a day, talked a lot
with his wife and was happy. She
got a kitten from Mitchell a week
before she disappeared, and a week
after she disappeared Beitzel
brought the kitten back, explaining
his wife had gone east.

It developed from the autopsy re-
port that near the spot where the
body was found there also was
found some partly formed
bones of an infant. This is one of
the most important bits of evidence
tending definitely to establish the
identity of the body. The chief
purpose yesterday was to establish
this identity and the cause of
death. All of those testifying yes-
terday knew the young woman
and who viewed the remains said
that in their opinion it was her body
as nearly as could be determined.

LOOK AT FISTOL
Mrs. Burns also related how she
and the young woman looked for
the number on the pistol which Beitzel
had when he called up a few days
prior to the automobile ride to ask
Barbara to tell him the number so
he could purchase the proper shell.

Throughout the inquest, which
was conducted by Deputy Coroner
Monfort, Beitzel sat apparently un-
moved, except when the woman on
the stand broke down and cried.
Asked if he wished to testify he said
that inasmuch as he felt that he
would rather not.

The police announced yesterday
that a butcher knife had been found
in the door pocket of the roadster
rented by Beitzel.

The three bundles of clothing were
returned from Phoenix to Chief of
Detectives Cline and identified by
Beitzel as clothes of Miss Mauer's.
He had sent away. He explained
that he merely wanted to get rid of
them, believing she had left him for
good.

When her husband was stricken
ill and compelled to cease cam-
paigning for the Democratic nomi-
nation for Governor in Missouri,
Mrs. Frances M. Wilson took the
stump in his behalf.

Word was received yesterday from
York, Pa., saying that Beitzel's
older brother, a York restaurant
owner, has taken steps to employ
counsel for Beitzel. The brother
stated that Beitzel was a "good
man" and that his derelictions ap-
peared only after his neck was in-
jured in an airplane accident.

AUGUST 7, 1928.—[PART II.]

PEN PONS

The President elected the one the most popular will disturb business.

They call Neal Dow the one who goes to those who have been elected.

Mr. Hoover is fond of the bull, but he likes his in the state.

"In God We Trust" was early coined. Apparently, the country didn't begin to know God until 1864.

A typical husband is one who asks his wife to look in the dictionary.

"A fan doesn't keep you getting hot." Not so, if you kind that whams you back to celebrate a home run.

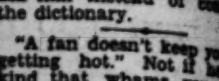

Sex equality: "My woman! Use the tray, spill ashes on my office rug."

"The homes of the families are vacant." Maybe the vacant look is the suit of association.

Americanism: "See how awful it is; kids cause the naughty party been cut out."

One reason why swaggers the heat better is because haven't any thermometers can't tell how hot they are.

It's incorrect to say sweat running down your face at a picnic. What you want is a fan.

The moments an American member are the first time a girl, the time he first job, and the first time he saw a butter.

Think what an awful some historical society of future will be trying to Hoover's old home for preservation.

Money isn't everything. Yankess have the money they can't hire a maid, a laundress and nurse for that week.

Philanthropy: Magnanimity giving somebody you because you will be put in the next stop.

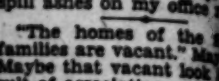

Al Smith's career proves can be a great man who knowing which side of a milk on.

Correct this sentence: "went all over Europe," and "and found the smile full."

When it comes to the all evil, even the strongest man may have a hard time.

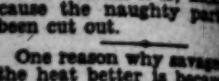

When a husband and wife in the foursome, one can look for a snappy game bridge.

Many a man never thinks putting something by for a day until he finds himself in a cloud.

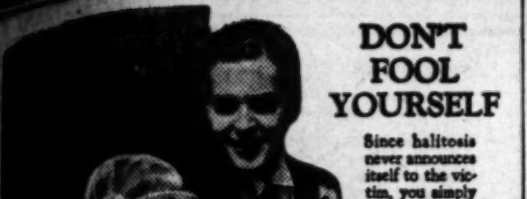

INVOKING THE LAW

James Biddad smote me with a law, with fury of a law, thereupon invoked the law. Justice might be done. My advice me to forget the law. Biddad's vicious blow, "I will run you into the wall," said, "as you must know, the court's decision is the law. The lawyers furnish the law, and you must mortgage and home when you pay off the bill. Oh, justice, truly great if there were free, but it's so costly, it's state should be free." I sternly said, "I am solved to ply the law's sword; there is a price involved that must not be ignored. If I permit this Biddad to get away with that, he will come back again tonight, smash my Sunday hat, be a joke, gadsook, if he brought to book." The went up from court to court, I settled yet; I found it an expensive sport, and I am in debt. I am a and a man, whose hopes have been their knell; a lawyer occupies the sedan that once I toiled so well. The hair is gray upon my face, I am no longer young, which I toiled so long. I am dark and bleak with age, throw a daily fit; a lawyer the easy chair where once I sat. There are deep lines on my brow, my face is not as it once was. With weary eyes I'm at desks that don't react; at times that once belonged to me, I own the law. But I've but listened to my fate that fateful day, and I've heretofore my world, and I've gathered all my gear, and I've comfort near the door.

DYER COHORTS BESPEAK TRUST

Majority of Church Said to Support Pastor

Ouster Trial Near End After Weeks of Argument

Preacher Again Takes Stand to Present His Case

That the majority of the members of the Wilshire Boulevard Congregational Church have been loyal to Dr. Frank Dyer was the gist of the testimony given at the hearing yesterday before Superior Judge Dyer at the trial of the ouster brought to trial by him and a board of trustees favorable to him.

George C. Terry, public auditor, one of the principal witnesses of the day, testified that a majority of the membership voted January 24 to retain him.

HEARING NEAR END

The fourth week of the trial began yesterday. The hearing, however, is expected to close tomorrow with the final arguments of attorneys.

Terry testified that a total vote of 248 for Dr. Dyer and 149 against might have been counted at the meeting of January 24 if proxies were included. Of members present there were 197 for him and ninety-eight against, while 137 of the total present voting were old members. The ninety-eight against were all old members.

DR. DYER ON STAND

Dr. Dyer took the stand in his own behalf again yesterday. He said the anti-Dyer faction comprises only about one-sixth of the total membership of the church.

James I. Tucker, former professor of engineering at the University of Oklahoma and now examiner for the city Civil Service and a deacon of the Wilshire church, took the stand and testified Dr. Dyer early in July read a letter from the pulpit asking that his contract be canceled as to salary, "because he was forming the American church."

The witness said the offer was refused and it was voted to retain Dr. Dyer.

Man Convicted of Arson Said to be Insane

Sentencing of Michael Tocsan, Rumanian art dealer, convicted of arson and burning insured property, arising out of the fire which destroyed the Russian Eagle Cafe in Hollywood last June, was deferred by Superior Judge Doran yesterday until tomorrow.

This delay was granted by the court to consider an affidavit submitted by Stanley Visei, attorney for Tocsan, which contends Tocsan is violently insane and for some time has been confined to a padded cell in the County Jail.

The affidavit asserts Tocsan has even threatened his attorney during violent moments; that he has been unable to tell a coherent story of the affair and is suffering from delusions.

FALSE PRESCRIPTION HEARING CONTINUED

Preliminary hearing of Charles A. Richter accused of obtaining prescriptions falsely, scheduled for yesterday, was continued until the 20th inst. by United States Commissioner Head. He is jointly accused with Eric Maas. Officially Maas was originally was apprehended with thirty-six prescriptions in his possession and that later 200 were found in his apartment.

DELL TOWER FUND ASKED

The Fire Commission has asked the City Council for an appropriation of \$25,000 to cover the cost of the erection of a new drill tower for the Fire Department.

IMMORTALITY OF MAN TOLD

Christian Science Lecture Given by Peter V. Ross

Boy Citizen Recounts Work of Mary Baker Eddy

Address Heard Last Evening at Local Church

"It will be remembered that Jesus, early in His Ministry, healed all sorts of diseases and even raised the dead, through spiritual means," said Peter V. Ross, C.S.B., of San Francisco, member of the Board of Lecturers of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass., in a lecture delivered last evening in the North Church of Christ, Scientist.

"After reaching the understanding whereby he could see and demonstrate that disease and death are, in Science, unreal, Jesus one day took three of His disciples up into a high mountain—up into the celestial consciousness which He had attained—and there communed with Moses and Elias, both of whom had passed from mortal life centuries before. So vivid was the picture that even the disciples saw these men, because, as the Scriptural narrative runs, the face of the covering cast over all people, was, for the time being, destroyed, and it was realized that individuals who are supposed to pass away in fact continue to exist and maintain their identity and carry on their work for as Jesus talked with Moses and Elias they spoke of His decease which He was soon to accomplish at Jerusalem.

SIXTY YEARS AGO

"For the storm was gathering, Jesus' teachings could not long pass unchallenged. One night (you all know the story) He was seized by a mob, given a mockery trial in the morning, and cruelly executed. Three days later He came from the sepulcher, and appeared not once, but several times to His friends and talked with them during a period of forty days. Then He ascended, that is, became invisible to the physical senses. He had demonstrated that individual life is indestructible and continuous.

"It might be thought that the significance of such a stupendous accomplishment would never be forgotten, but, within two or three centuries, it was, very largely, until some sixty years ago, when, here in America, a spiritually minded and deeply religious woman, apparently approaching the end of mortal existence as the result of an accident, turned to her Bible for consolation. While she was reading one of the Gospel accounts of healing performed by Jesus, a sense of strength and freedom stole over her. She arose, dressed, and presented herself to anxious friends, sound and well.

"But she was not content with this. She must understand the process of spiritual healing. To this end she searched the Scriptures and discovered the law of the Christ. Jesus, in overcoming disease, setting aside material laws, and abolishing death itself, invoked absolute Science, which He understood and which, as He declared, others can understand and apply as He did.

CONTINUITY OF LIFE

"In order that the world at large might profit by her discovery, she set forth the fundamentals of this Science in her great book, 'Science and Health.' Afterward she established the Christian Science Church with its periodicals and other means for disseminating and guarding the truth. Thus it was, in brief, that Mary Baker Eddy became the discoverer and founder of Christian Science, the leader of the Christian Science movement—a movement which has for its purpose nothing less than the overthrow of sin, disease and death.

"The conviction is all but universal that man is immortal. When we conceive of man as consciousness, instead of corporeality, we place ourselves in a position to appreciate his immortality, for consciousness persists and continues whatever may seem to happen to the physical body.

"In Christian Science practice we observe that right thinking, treatment, or prayer heals the ailing or sleeping patient as quickly and effectively as though he were awake or present."

Club Bids Adieu to Ray Hughes

Ray A. Hughes, advertising sales manager of the Southern California Telephone Company and president of the Second Millers Club, was honored last night at the home of J. Danby Day, 310 La Fayette Park Place. More than 150 members of the club and their friends bade farewell to their president, who leaves soon to take up work with the American Telephone and Telegraph Company on national advertising with headquarters in New York.

The Second Millers Club of the Temple Baptist Church is composed of about 125 young business men who meet every Sunday morning in the Billmore. Mr. Hughes, the son of former City Councilman Hughes, is planning to organize such a club in the East. Mr. Day is the director of the club and president of the Citizens National Bank.

Pasadenan Held for Grand Theft

Louis C. Rowley, 43 years of age, of 188 South Bonnie avenue, Pasadena, was arrested yesterday by Deputy Sheriff Shafer and Kelley charged with eleven counts of grand theft, according to Sheriff's office reports.

Rowley, the arresting officers assert, is accused of bilking several prominent Pasadena business men of approximately \$800 through a series of fraudulent real-estate transactions.

Extraordinary Reductions on Fancy Linens and Sets

—A message of interest to the woman who has longed for lovely linens and yet has not felt her household budget warranted the expenditure for fancy linens. This is an opportunity that she has looked for. Many also are at reductions that we have not space to enumerate.

Brittany Scarfs, \$1.75

—Exquisite patterns offered in these beautiful lace scarfs. All over patterns with lace borders neatly mitered at the corners, or "set-ins" of odd shapes add to their effectiveness. Size 18x50.

Linen Cloths, \$1.39

—Breakfast cloths of linen crash have hand-blocked centers of beautiful floral designs, or—Colored borders—Two sizes, 49x49 or 54x54, at \$1.39.

Reductions on Odd Lots of Cloths, Napkins and Sets

—Some are all white, others hand-painted or with woven colors . . . from 1½ to 3 yards in length.

Tea Napkins, 6 for \$1.95

—For the formal bridge tea these napkins from Madeira are always appropriate and dainty. Charming in design with plain or rose scalloped edges. Six in a box for \$1.95.

Colored Sets—4 Napkins, \$1.65

—For luncheon or breakfast! Cream crash linen with plain centers and colored borders of rose, gold or green. Cloth 45x45 with 4 napkins.

August Sale of Springs and Mattresses

New Mattresses for Comfort

—It is an interesting side light on human nature that one will be most particular about keeping between fresh sheets, clean blankets and yet will sleep on the same mattress for years. Look to your comfort, see that you have a fresh new mattress for your bed.

Leader Mattress, \$15.95

—Filled with cotton and choice linters felted, comes in two sizes at the same price. 45 pounds, full size, 35 pounds, twin size. Made with roll edge, neverstretch features and tufted.

Drowsyland Mattress

Full Size \$36.00, now \$31.00
Twin Size \$32.00, now \$29.50

—A carefully tailored mattress with fillings of the best. Made with roll edge, neverstretch construction.

Double Coil Springs Now \$13.95

—Reduced from \$17.50

—As we owe ourselves the greatest comfort life affords during our rest periods . . . the springs of our bed should be of the best construction so that we get the utmost of comfort, complete relaxation for the duties of the following day. Double coil springs and cross helical ties and the swayless stabilizer featured in these springs make them fit for any standard bed. We also show the well known

Deluxe and Leggett's Stayyoung Springs at \$25.00

Thousands of Yards Tub Fabrics at Half Price

—An important sale for vacation times. Charming wash goods that have coolness and chic to their credit as well as a lowered price. Irresistible values . . . cool and summery.

Instantly Removes All Traces of Fatigue

Alice Wunder

BLEACH PACK

GIVES IMMEDIATE RELIEF FOR PAINFUL SUNBURN

Summer brings freckles, tan, sunburn, and windburn roughness, dryness and wrinkles unless the skin is treated properly after an outing, so I particularly want to draw your attention to my "Alice Wunder Bleach Pack," for here, indeed, is a preparation that is entirely different from any other beauty aid that has ever been marketed. It is so effective and easy to use at home and dries while one is changing clothes or taking a bath, and, best of all, it does not stain the finger nails.

Every woman who uses my packs according to the simple directions, will find a tremendous change in the color of her skin, as well as in the texture and general condition. Please do not confuse my "Bleach Packs" with ordinary clays, pastes and other concoctions that are supposed to bleach the skin, as well as remove facial blemishes. As I said before, it is entirely different and is the result of 15 years actual experience in my own Beauty Parlors, where it was my privilege to serve many leaders of society from all parts of this country, as well as from abroad.

The price, too, is unusually reasonable—30 heavy or 60 light treatments costing you only \$2.00—a quantity sufficient to last the average person a whole season.

P. S.—A heavy pack gives immediate relief to a sunburnt skin.

(Coulter's—Toilet Section—First Floor)

Joshua Little

BY LEE SHIPPEY

I GUESS you'll call me old and crabby, but I'm getting so I refuse to class even an ocean-flying aviator as a hero unless he is inspired by heroic motives.

After De Pinedo and Lindy flew the Atlantic and the Southern Cross flew the Pacific and Byrd and Amundsen flew to the North Pole, I can't see that any other aerial trips to those spots are inspired by anything but adventurous spirits and desire for personal gain.

A man may be very brave and yet be a darned fool. And some men will do anything to get a roll—even go over Niagara in a barrel. But they don't advance the world a whole lot when they do it.

So far as I can see, the only airplane flights which will be worthy of world-wide attention from now on are those to the South Pole and to the top of Mt. Everest. I wouldn't give a nickel or read a column to encourage

any other flight, even if the heroes or heroines who went to make it never get on the vaudeville stage.

Yea, Palomine, when you prove a thing which never has been done can be done you set a record in human achievement and progress. But all the copycats of both sexes will have to show me they're also doing something for the world before I'll even give them three cheers.

More Off Than On

"Do you do much riding?"
"Oh, off and on."

The Urge
Hub: Columbus arrived in America in 1492.
Dub: How much did he want to borrow?

All a flapper needs nowadays to become known as a linguist is the ability to speak one language slipperily.

The welcome on the mat has been replaced in New York by the sign: "Follocked—Come In."

Experience!
Madge: Have you ever felt suddenly that the thrill of a lifetime was about to come to you?
Horstense: Oh, yes, dozens of times!

Neuler to Fight Again Next Year

Heavyweight King Will Resume Ring Career

Best Training for Tilt When Show Closes

Back FARELL

WEEK, Aug. 6. — Jack Neuler, the former champion, will fight with Tex Rickard to emerge from temporary retirement.

Neuler, who was defeated by Rickard in a heavyweight elimination tournament which took place at Madison Square Garden this winter.

The signing of Neuler will be no interference with the summer season, which probably will not return to the arena until September.

Neuler probably will be in the arena for the summer season, which probably will not return to the arena until September.

Martha Norelius Shatters Olympic Swim Mark

RETAINS TITLE
IN GREAT RACE

Own Record for 400 Meters Cut by 2 3-5 Seconds

American Water Polo Squad Beaten by Hungary

Crabbe and Ruddy Place in Fast 1500-Meter Swim

AMSTERDAM, Aug. 6. (AP)—A brilliant championship victory by Martha Norelius of New York in the women's 400-meter free-style swim and an unexpected defeat by the water polo team at the hands of Hungary, 8 to 0, featured the activities of the American Olympic water sports representatives today.

In addition, Clarence Crabbe of Honolulu and Ray Ruddy of New York finished third and fourth, respectively, in the 1500-meter men's free-style final, which was won by Arne Borg of Sweden, also in record-breaking time. Andrew Charlton of Australia, the former champion, was second.

TWO FINALS

There were only two finals on the day's swimming program, but preliminary competition got under way in the 200-meter breast-stroke swim and in springboard diving. Thomas Blankenberg of Oakland, Cal., the only American breast-stroke entry, qualified in a heat won by Erid Rademacher of Germany, world's

second.

THESE GIRLS HAVE "IT"—AND PLENTY OF IT

Below are shown two members of the gentler sex who distinguished themselves on the field of battle at Amsterdam. Photo shows Miss Ethel Catherwood displaying her form in winning the women's high jumping event Sunday in the Olympic finals. Her performance of 5 ft. 3 in. shattered the former world record. Ethel's just full of pep and hails from Canada. Miss Martha Norelius of New York appears in the oval. Martha saved the day for the United States yesterday by a brilliant victory in the 400-meter free-style swim. Her mark of 4:45.26 not only bettered her former world record, but also enabled her to retain the Olympic crown. (P. & A. Photo.)

JACOBS SENT
BACK BY CUBS

Angels Get Former Cloutier Back from Chicago

Sheiks Meet Seraphs Today in Series Opener

Rhodes and Peters Will be Opposing Pitchers

Ray Jacobs, the hard-hitting infielder whom the Chicago Cubs grabbed last spring and then unfarm to the

Angels, is back in the American Association, will rejoin the Angels this week. It was announced yesterday at Wrigley Field.

Jacobs, who went up to the Cubs despite the fact that he was still suffering from a broken leg that he received a year ago July 4, was hardly used at all by the Bruins, who then farmed him to Toledo, Jacobs was used at short by the Mudhens and batted well over 300 but was turned back to the Cubs because his leg slowed him up in the field. Then the Cubs turned him over to Minneapolis on option as part payment for Pat Malone. The Millers recently turned him back to the Cubs.

Mike Kelly, Minneapolis manager, stated when he turned back Jacobs that he would certainly keep Ray if he belonged to the club outright, but as he was still the property of the Cubs did not feel that he should keep

him.

When I built Wrigley Field," said Wrigley yesterday, "I put \$1,500,000 into the plant and did so without expecting to get anything in the way of a profit on the venture. To me Wrigley Field was to be a sensitive enterprise, a gift to Los Angeles, as it were. The only thing

which yesterday defeated Canada in its first appearance, showed poor form and its defense went to pieces. The first half ended with the Americans leading 6-3, but in the second half the British took the offensive and kept it most of the time except when the John-Baptist players in a burst of speed in the middle of the period tied the score at 6-6. They then slugged and the Brits scored the deciding goal.

NEXT MOVE UP
TO BILL LANE

Stars' Owner Must Agree to Admit Ladies Free

Fourteen Weeks of Baseball Loom for Next Year

Boss of Sheiks Has Nothing to Say About Fuss

BY BOB RAY

Bill Lane and his Hollywood Stars gained nothing in the way of good news by the arrival yesterday of William Wrigley, Jr. The big boss of the Angels, who had been in the city for a few days, was met by the Stars' owner, J. P. Patrick, at the airport. The Stars would be ousted from Wrigley Field next year unless they agreed to admit ladies free to all games when Hollywood is the home club.

Lane does not agree to Wrigley's ultimatum, and it appears probable that he will not. It means that Los Angeles fans will get only fourteen weeks of baseball next season.

Lane, who played golf yesterday while Wrigley was speaking his piece out at Wrigley Field, had nothing to say about the baseball fuss when informed of the Angels' owner's remarks. The owner of the league-leading Hollywood Stars took it for granted that Wrigley would back Patrick's stand in ousting him from Wrigley Field next season.

"When I built Wrigley Field," said Wrigley yesterday, "I put \$1,500,000 into the plant and did so without expecting to get anything in the way of a profit on the venture. To me Wrigley Field was to be a sensitive enterprise, a gift to Los Angeles, as it were. The only thing

which yesterday defeated Canada in its first appearance, showed poor form and its defense went to pieces. EVE IN TROUBLE AS USUAL

Question of Admissibility of Including Feminine Events in Olympic Games Causes Row

BY ALAN J. GOULD, Associated Press Sports Editor.

AMSTERDAM, Aug. 6. (AP)—Controversy over whether women's track and field events should be retained on the Olympic program was brought to the floor of the congress of the International Amateur Athletic Federation this afternoon.

A majority report from the council in which the United States joined favored retaining the feminine features limited to not more than six events, provided the grueling 300-meter race be eliminated, but sharp opposition immediately developed. A prospective fight over the issue was postponed until tomorrow after Finland's representatives had moved to abolish the women's events.

The federation reversed itself on tenth-second watches, W. L. Felt, timing by them for races up to and including 200 meters only, after previously refusing to accept any records on a tenth basis.

Watches endorsed Today's action which, it was specified, is nonretroactive, followed a report from a committee of three endorsing the accuracy of tenth-second watches and revealing that the perfection of accurate hundredth-second time pieces is likely in the near future. Charley Faddock's now famous 9.5-10. for 100 yards would have been a world's

Fidel La Barba and Mastro to Mingle in Star Ten-Round Bout at Olympic Tonight

BOYISH MARVEL MEETS EX-KING

Sensational Newcomer Out to Finish Up Angelino

Chicago Boxfighter Holder of Envious Record

Former Banty Ruler Likely to Have Tough Spot

BY KAY OWE

Fans who go to the Olympic tonight may not go in vain.

Two Italian boys—one a former champion who retired, undefeated at the weight, the other a newcomer, a bantamweight, will meet in a ten-round bout at the Olympic tonight.

What he accomplished at Amsterdam was unexpected. The world acclaims the unusual, and Percy Williams' double win at Amsterdam was awe-inspiring.

Hereafter the world will expect much of Percy Williams. Success will be anticipated from the boy who won the 100 meters and the 200 meters at Amsterdam.

But the future victories of Percy Williams will not bring the thrill that arose when he raced home ahead of the track-giants at Amsterdam—the Wykoffs, the Borahs, the Housens, the Koenigs, the Coras, etc. The dark-horse glamour is gone.

La Barba is a biter who can lay the chunk with either hand and the possibility that fans may see Fidel on the canvas makes an alluring picture.

If it could be advertised and carried out as advertised Jack Doyle's name would not be big enough to hold off the rush.

But there is a chance that La Barba will solve the lesser-known Mastro and tie him up for the evening for the usual winning fight.

La Barba is too smart to open up and try to outlast anybody. The former flyweight ruler has never been a sponge for a punch. He can walk as straight as a string. He can go in a classroom and hold his own with any other kind.

Mastro has made one fight here. He looked like a champion the two rounds he used in knocking out Trip Limbaco. Against Hueria Evans the Filipino stood up good.

Limbaco was limping the first time that Mastro used.

La Barba had only a small edge over Evans. Based on these facts Mastro is a great short-end bet.

In Chicago many of Mastro's admirers are picking him to win over La Barba by a knockout. Over half of the professional bouts have ended in knockouts.

Heavyweight champion, recognized as the best of the East, is expected to fight Mastro in the 14th round. The champion will be the best of the Olympic.

Matchmaker Wadsworth is trying to make a match for the 118-pound championship for Graham while he is in the West. His best disposition would be La Barba.

Billy DeFoe meets Ben Golden in the special. The two fights are Luis Reyes vs. John Moran and G. Kluemper vs. Orlando Lucero.

Mastro and La Barba will weigh 128 pounds.

MARIBEL COPS YACHT EVENT

(Continued From Eleventh Page)

Albert Nelson, J. Vanheusen, chief engineer, was used as the starting boat.

The final placing of the B-boat was as follows:

Maribel, Pirata, Friendship, Weather, Alpha, Alpha, Zephyr. The six-meter placings were: Maybe, Synovae, Gila, The P and Q-class, Sings, Windmill, Minerva, the six-meter II, Orsona, The X and Y placings: Wileta, Vagabond, Ocean, Wolf, Wanderlust II, The M, N, P and Q-class placings: Dab, T, V, Highlander, Wetona.

Speedster won the star-class race in the harbor from Newport, Jeter came in first in the Marion race held inside the breakwater during the morning.

RABBIT PUNCHES

HE MADE HISTORY

OF ALL the unsung heroes that emerged from the conflict of speed and brawn at Amsterdam the name of Percy Williams, the shy young schoolboy from Vancouver who raced under Canadian colors, stands pre-eminent. His feats overshadow America's quantity triumphs, in the Olympic Games.

Even a Frank Wykoff victory in the 100 meters would have paled into insignificance beside the unprecedented feat of this youth who captured both the short flat races from the greatest congregation of sprinters that ever assembled at an Olympic Games.

The great German sprinter and the great American sprinter—raced as the best in history—altered as the flying feet of this unknown boy swept to triumph.

Doublet Williams and his rapid feet will show the way to go home in many another flat race, but nothing the Vancouver boy can do in the future ever will take rank with his feats in the games of 1928.

What he accomplished at Amsterdam was unexpected. The world acclaims the unusual, and Percy Williams' double win at Amsterdam was awe-inspiring.

Hereafter the world will expect much of Percy Williams. Success will be anticipated from the boy who won the 100 meters and the 200 meters at Amsterdam.

But the future victories of Percy Williams will not bring the thrill that arose when he raced home ahead of the track-giants at Amsterdam—the Wykoffs, the Borahs, the Housens, the Koenigs, the Coras, etc. The dark-horse glamour is gone.

CHARLES RUTAN LEADS CADDIES

Tops Field in Bag-stoters' Play at Hillcrest

Anderson Shows Way to Boys at Rancho Course

Willie Low and Scott Tie in Pro Tournament

Charles (Chick) Rutan, Los Angeles Country Club bag carrier, clicked his way to a 71 score yesterday over the Hillcrest Country Club layout to lead the way in the opening round of the Southern California open caddy golf tournament.

Eighty-seven caddies played a day of fine golfing by Southland's caddy golfers. Carl Anderson, a San Diego youngster, topped the field at Rancho in the opening round on that course with a 73.

The play at Hillcrest was much faster than that at the Rancho course. Besides Rutan, three other caddies turned in scores under the 75 mark at the Hillcrest club. Don Linton, of Pales Verde, John Amelin, of Fox Hills and Ken Owens, of the Los Angeles Country Club had 74's, as did Ray Mangrum, of Sunset Fields and Larry Keese, of Wilshire. Eighty-seven caddies played a day of fine golfing by Southland's caddy golfers.

LESTER STOEFFEN WINNER IN NATIONAL TENNIS TOURNEY

CLEVELAND, Aug. 6. (P)—Favorable among forty-six aspirants for the national public parks tennis championship held by Ted Drewes of St. Louis advanced through the first round of the sixth annual tournament which opened today.

Drewes reached the second round by defeating Richard Ross, Scranton (Pa.) youth, in a four-set match. The champion's hard drives won the first two sets. By that time Ross had recovered from stage fright and surprised his opponent by capturing the third, but he could not withstand Ted's short shots and backhand drives. The final score was 6-3, 6-3, 4-6, 6-3.

William Bascom, St. Louis junior star, extended Barclay Stevens of Cleveland to five sets before the local entrant downed him, 2-6, 7-5, 6-0, 6-3, 6-3.

Lester Stoeffen of Los Angeles won handsily from Lester Uihoff of Cleveland, 6-3, 6-3, 6-3.

The singles-title contenders represent twenty-four cities. The men's doubles will start Wednesday.

Results: FIRST ROUND

A. C. Orfield, Minneapolis, defeated C. H. Goss, Amsterdam, Philadelphia, 6-3, 6-3, 6-3.

Demetrius Mitchell, Washington, D. C., defeated Lester Stoeffen, Los Angeles, 6-3, 6-3, 6-3.

PRO CHARGES AGAINST TILDEN
BEFORE EXECUTIVE COMMITTEE

NEW YORK, Aug. 6. (P)—Charges against William T. Tilden of violating the amateur rule of the United States Lawn Tennis Association will be considered at a meeting of the executive committee of the governing body at the Vanderbilt Hotel the 24th inst. it was announced today.

The meeting was called by Samuel H. Colom, president of the association, in a telegram from the U.S. Paris, on which he is returning with Tilden and other Davis Cup players. Secretary Harris S. Knox of Chicago notified all members of the executive committee that the meeting had been called by Colom.

Charges against Tilden were referred by the advisory and finance committee shortly before the cup matches in Europe.

MARTHA NORELUS SETS
NEW OLYMPIC RECORD

(Continued From Eleventh Page)

record-holder, in the new Olympic record time of 2m. 52s. Blankenbush finished second. In diving, Peta Des Jardines, Miami Beach, Fla., and Hilda Gieseler, better known as Mickey Riley, of the Los Angeles A. C., qualified for the final, while the third American entry, Harold Smith, of the Los Angeles A. C., was eliminated.

It was a girl who provided the highlight performance of the entire day. Covering 400 meters in 2m. 52s., Miss Norelus made a show of her field and easily retained her Olympic championship won in 1924. Her time was 2-5 seconds faster than the world's record she herself established only Saturday in a preliminary heat. It also was 19-5 seconds faster than she made in winning the crown at Paris and best both the world standard and new Olympic record.

Miss Norelus, 23, made at Coral Gables, Fla., last year and on which she had applied for a world record. Her lead had been followed by a series of victories. She had won the 400-meter race at the world championships in 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012,
